

Estimate of Census Totals of Canada Expected in October

Figures of Cities and Towns Already Issued Are Subject to Revision; Ottawa Officials State Returns Are Coming In Satisfactorily.

Ottawa, Aug. 20.—(Canadian Press)—An official estimate as to the result of Canada's "counting of noses" in the 1921 census will not be available before the middle of October, it is intimated by officials of the Census Branch. While some of the figures of certain cities and towns already have been issued, these are subject to revision on account of closed houses and absences, and these may be changed considerably when the final figures are available.

Census returns are stated to have been coming in very well all along, but there are outlying sections where the work of counting the population was expected to take weeks or even months, in as much as it was necessary to equip the enumerators with canoes, dog sleds and even seagoing tugs in order that they could check up all the inhabitants of the sparsely settled frontiers.

DEPRECATES WASTE IN SAWMILLS

Sir William Jones Examines Fuel Conservation

The waste in the sawmills and wood-working industry on the Pacific Coast has astonished Sir William Jones, British technical expert, who is associated with Sir Arthur Duckham in the design of chemical and scientific plants for industrial purposes. Sir William is now in the city with Lady Jones and Miss Jones, at the Empress Hotel.

Both partners took an active share in the war services of the Imperial Government. Sir Arthur being Director of Aircraft Production. Now Sir William, in the course of a tour which has brought him across the United States, and which will take him back through Canada, has been looking into the question of fuel conservation.

He states to the Times that the sawdust nuisance, which has caused so much trouble to householders in the vicinity of the sawmills here, as elsewhere, can be entirely obviated, and at the same time secure the creation of important by-products which can be obtained therefrom. He has also indicated that the wasteful use of lumber in this country will make future generations suffer.

Sir William said that many valuable discoveries have been made by scientific research, and his Government representative on the boards of several research councils, he has been of late years able to take an active share in the application of science to industry. He pointed out that his firm were most directly interested in constructing the plants for the application of chemistry to the arts, yet as engineers it was natural they should take a keen interest in the evolution of industry, stimulated as it had been so greatly by the war. His firm has specialized in furnace work, the carbonization of coal, and similar matters.

After meeting Mr. Norman Yarrow to-day—he is an old friend of Sir Alfred Yarrow—Sir William plans to leave for Vancouver to-morrow.

300 MEN MARCH IN WEST VIRGINIA

Take Hand in Mingo Industrial Controversy

Charleston, W. Va., Aug. 20.—A body of men, said to number between 200 and 400, assembled to-day at Marmet, east of here, for the purpose of marching into Mingo County, where an industrial controversy has prevailed for more than a year, and which is now under martial law, according to reports reaching Charleston this afternoon.

In Iowa.

Fort Dodge, Ia., Aug. 20.—Two men were shot to-day in a running gun fight between city police, Sheriff Geo. Bassett and H. I. Yawke, state agent, and three men believed to be the bandits who robbed the Citizens Savings Bank at Curlew Friday. One of the bandits was shot three times, a second was arrested and a third escaped. A hotel bellboy was shot through the leg by one of the bandits when returning the fire from the officers.

LESS GRAIN IN PUBLIC ELEVATORS

Figures Issued at Ottawa Disclose Decrease

Ottawa, Aug. 20.—(Canadian Press)—Further decrease in the amount of grain in store in the different public elevators throughout Canada during the week ended August 13 are reported by the Internal Trade Branch of the Dominion Bureau of Statistics.

Wheat in store decreased 1,345,125 bushels to 5,658,889, as compared with the previous week. Oats decreased 155,441 bushels to 14,494,459. Barley decreased 255,378 bushels to 2,622,978. Flax decreased 30,162 bushels to 1,197,624. Rye stocks increased 1,239 to 149,788 bushels.

SIR JOHN SIMON MAY BE UNABLE TO COME HERE

Rt. Hon. Sir John Simon, British jurist and statesman, wired the President of the Canadian Club of Victoria here to-day as follows:

"Regret extremely unforeseen circumstances compel me to cancel visit to Victoria. Can only reach Vancouver Thursday, returning Friday. Please convey my sincerest apologies to Canadian Club for inconvenience caused."

An effort is now being made to induce Sir John to come here on Thursday night, and speak on Friday, returning to Vancouver on the afternoon steamer in order to enable him to keep other engagements.

PATHFINDERS START SWING NORTHWARD

Victoria Motorists Delighted With Idaho Country

The Victoria pathfinders party is beginning now to swing northward again in its motor trip from Seattle to Calgary, according to the daily telegram received by The Times to-day from the party. The new organization, led by Alderman Todd, leader of the party, Alderman Todd's message dispatched from Sandpoint, Idaho this morning, follows:

"We left Spokane at 3 o'clock on Friday afternoon, making a detour of a few miles to visit Hayden Lake, a popular summer resort with an attractive hotel and an eighteen hole golf course chiefly patronized by Spokane and Seattle people. We arrived at Sandpoint after dark. The day's run covered seventy-eight miles. Sandpoint is a surprisingly fine little town with a thirty-five hundred population, paved streets and good stores. The roads for last forty miles are not quite so good as the previous ones. The route through the Panhandle of Idaho is included in Idaho's highway programme, as this section is portion of main north to south highway, and the improvement will be made close to the international boundary. The weather is fine and not too warm."

INDIA DELEGATE WILL VISIT B. C.

Sastri to Come on Premier Meighen's Invitation

London, Aug. 20.—(Canadian Press Cable)—It is understood that Mr. Sastri, who was the Indian delegate to the conference of Empire Prime Ministers, after attending the forthcoming meeting of the League of Nations, will go to Canada on invitation of Premier Meighen. He will look into the status of British Indians in British Columbia and then go to Fiji and the Spring of 1922 in search of Indians there. He will also visit Australia on the invitation of Premier Hughes and will return to India next February.

BITTEN BY SNAKE, MAN RECOVERING; ASKED WHISKY

New York, Aug. 20.—James McArdie, a keeper in the Bronx Zoo, was reported recovering to-day from the effects of a bite by a copperhead snake. McArdie asked for a drink of whisky, which he declared was the best remedy for snake bite, but the doctor at the hospital where he was told him there was no whisky in the institution. They gave him a serum instead.

FRANCE TO GET RID OF FLEET OF CARGO SHIPS

London, Aug. 20.—(Canadian Press Cable)—A Reuter dispatch from Paris says that a law has just been passed in France stipulating that the French state-owned fleet of cargo steamships must be sold by August 21, 1922. It is evident, adds the dispatch, that private owners have to face serious competition in the next few years, for the huge fleet of the American Shipping Board has not yet been disposed of.

Way Is Prepared For Russian Famine Relief

Riga, Aug. 20.—The agreement between the United States and Russia providing for American relief for the famine sufferers of Russia was signed this morning by Walter Lyman Brown, European representative of the American Relief Administration, and Maxim Litvinoff, representative of the Russian Famine Committee.

London, Aug. 20.—Famine conditions in the Tartar region are very grave, says the Moscow correspondent of The Daily Herald. Private stores of food have been exhausted and the rich and poor alike are suffering from hunger.

No Propaganda.

Washington, Aug. 20.—The agreement signed at Riga gives the Soviet authorities the right to expel the Russian personnel of the American Relief Administration but not American officials or relief workers. Secretary Hoover said to-day, The Relief Administration, he explained, has volunteered, however, to withdraw any of its agents in the event of unwarranted political activities on their part.

OIL FOUND ON ALASKA COAST

"Lake of Oil" Near Arctic Ocean Reported

Claim Made by Party From California

Nome, Alaska, Aug. 20.—Discovery of new oil fields in the vicinity of Wainwright Inlet and Point Barrow on the Arctic coast of Alaska, which it is believed here may rival in importance the Mackenzie River fields of Northern Canada, was reported to-day by members of a California prospecting party which had been in the district since last July 14.

According to R. D. Adams, head of the party, large seepages occur in the neighborhood of Cape Simpson, east of Point Barrow. They appear, he said, to spring from two or three conspicuous barren mountains back of the cape and within a mile of the Arctic shore line. They flow several hundred yards into "lake of oil."

Others Searching.

Another party which left Nome in July is also prospecting in the neighborhood. It is "lake of oil" between Point Barrow and Demarcation Point, on the Canadian boundary, were first made about five years ago by a teacher at Point Barrow. Natives who had visited the region said the oil bubbled from the tundra in large amounts.

SIR SAM HUGHES GAINS STRENGTH

Lindsay, Ont., Aug. 20.—The condition of Sir Sam Hughes is improving. He sat up in bed yesterday.

SAW NO MAN FOR MORE THAN YEAR

Trapper Returns South From North Saskatchewan

Prince Albert, Sask., Aug. 20.—Jesse Brooks, a white trapper who for nearly two years had been away from civilization in the "barren lands" of the North, and who for more than a year had never seen a human being, passed through here to-day.

Describing his experiences, he said the monotony had never become oppressive and that he had found sufficient occupation in curing skins and manufacturing moccasins and clothing to overcome any ennui. His isolation had been peaceful, he said, in addition to his desire to hunt and trap in a country where his operations would not be molested by Chippewans.

AT WOLLASTON LAKE

When he first left the lake in June, 1919, his intention was to hunt in the vicinity of Cree Lake and Fond du Lac, but he found that he was still within the trapping area of the Indians and proceeded through Black Lake and navigated the Black River, which is regarded by the natives as unpassable owing to its swift current and treacherous channels, and passed into Wollaston Lake. He thoroughly traversed that lake and took up his station at the most northerly point of the lake, the Fifty-Ninth Parallel and nearly 200 miles east of Fond du Lac, where he saw his last human being in September, 1919.

He said that he heard with surprise on his return this year that the provincial police had made a patrol nearly 2,500 miles in the Fall of 1919 and in his opinion the three-nation Indians had left a note in his cabin at Fond du Lac stating he had gone east, and had also requested the Indians to make the lake known.

EXCELLENT HEALTH

Brooks is a healthy young fellow just turned thirty and says he never experienced even a headache during his long wanderings and enjoyed the best of health all through.

In his opinion the mineral wealth is there, but commercial transportation will present a difficult problem, as it is impossible to put even a scow on the northern streams.

PRINCE ALEXANDER IS RECOVERING

Will Take Oath as Jugo-Slav King

Paris, Aug. 20.—Prince Regent Alexander of Jugo-Slavia, who has been ill at Neuilly for several days following an attack of appendicitis, is considered by his physicians as being out of immediate danger.

Alexander was proclaimed King at Belgrade on August 17, and is expected to take the oath as required by the Jugo-Slav constitution within ten days after the death of his father, the late King Peter. It is possible, therefore, that the ceremony may take place at Neuilly if Alexander does not recover sufficiently to be moved to the Jugo-Slav Legation here.

NO CHEAP LIQUOR YET

Members of the Liquor Control Board and officials, including James Patterson, purchasing agent, were in session this morning with Premier Oliver and the Executive Council.

Premier Oliver announced afterwards that many matters concerning the Liquor Board's business were taken up, but there would be no reduction in liquor prices just yet.

TRAINS SOON TO FORT MURRAY FROM EDMONTON

Edmonton, Aug. 20.—The first complete train to run over the Alberta and Great Western Railway to the end of the steel left here and six hours and thirty minutes later was reported at Fort Murray on time, on a reduction in running time of three hours. The end of the steel is now within seventeen miles of Fort McMurray and will be into the city before the snow flies.

Dublin Dispatches Have Less Optimistic Tone

London, Aug. 20.—Dispatches from Dublin to London newspapers appear to reflect pessimism over the Irish situation in view of the latest developments.

Henry Nevinston, war correspondent and author, telegraphing The Daily Herald, says the situation is undoubtedly serious and that he is "unable to see hope as brightly as some do." He admits, however, that hope still exists.

"If the Irish 'republicans,'" his dispatch continues, "frame the reply to Great Britain's terms and submit it to the Dail Eireann for approval, rather than discussion, it is almost certain that it will be accepted with minor alterations. The members of the 'Republican Army' are, for the most part, accustomed to discipline and were elected or appointed by the 'Republican Army' to support their negotiations and subsequent peace comes from the information of theorists and doctrinaires, acting upon the spirit of militarism."

POSTAL WORKERS WILL MEET HERE

Convene From All West in Convention Monday

Postal workers from all over Western Canada will gather here on Monday for the annual convention of the Amalgamated Postal Workers of Canada. About thirty-five delegates representing cities as far East as Sault Ste. Marie will attend the convention, it is expected. Already the delegates, having the afternoon, arrived in the city this afternoon, are busy here now drawing up plans for the convention.

Christian Sivertz, President of the Amalgamated Postal Workers, and president also of the Victoria Trades and Labor Council, will preside over the convention, it was announced to-day. "The convention will continue in session for four or five days."

The main purpose of this year's convention will be to seek more satisfactory arrangements, and relations with the postal carriers, and the Amalgamated Postal Workers.

It will be recalled that the postal workers of Canada split into an eastern and western organization some two years ago. The western organization is called the Amalgamated Postal Workers of Canada while the eastern organization is known as the Letter Carriers Association. There are signs of a reconciliation of the two bodies, it is stated. The fact that the eastern organization is sending a fraternal delegate to its convention in September is interpreted as a move toward friendship and perhaps later consolidation.

NO LIQUOR SEIZURE ON HIGH SEAS

British Attitude Made Plain to United States

Washington, Aug. 20.—Formal notice that it cannot recognize jurisdiction of the United States over the high seas beyond the three-mile limit, fixed by international law for many years, has been served by the British Government in connection with the seizure of two British ships, the Long Island Coast of the British schooner Marshall, reported to have been laden with liquor.

British authorities will await the outcome of court proceedings and final establishment of the vessel's registry before any further diplomatic step is taken.

Through U. S.

Montreal, Aug. 20.—The ruling of Secretary of the Treasury Mellon that liquor may be shipped from one country to another through the United States resulted to-day in the movement southward of many thousands of gallons of beer. The shipments mainly are consigned to the West Indies, the Guianas, Central and South American countries.

The beer had been held up owing to the interpretation of the United States prohibition law by former Attorney-General Palmer, who ruled that shipments consigned from one country to another and intended to pass through the United States, violated the prohibition law.

NO BRITISHERS ACCEPTED FOR SPANISH ARMY

London, Aug. 20.—Enlistment of British citizens for service in Morocco by the Spanish consulate here was suspended, it was declared by a number of newspapers to-day, and men who volunteered to enter the Foreign Legion in the fighting against the Moors will be discharged.

Petrograd Is Leased by Group of Britishers

London, Aug. 20.—It is reported that an English financial group has secured a long lease on the port of Petrograd from the Russian Soviet Government.

Dispatches from Soviet Russia last June stated that negotiations for the establishment of a company to take over the administrative power of the port of Petrograd were going on, and a number of London bankers were interested in the project.

At that time it was said the company would take over control of all workshops and factories in Petrograd and that the British might extend their operations to other Russian ports.

Cleavage.

London, Aug. 20.—Recent reports that a cleavage has developed between the ruling spirits of Bolshevik Russia appear to be partly corroborated by statements attributed to educated Russians in a special dispatch to The Daily Mail. The correspondent declares he has interviewed refugees along the Russian-Polish frontier and quotes professors, lawyers and others as denouncing the Bolshevik regime. Without exception, however, the Russians exempt Nikolai Lenine, the Bolshevik Premier.

Wider.

The correspondent asserts that the division between the Right, represented by Lenine and Zinovieff, Bolshevik Governor of Petrograd, and the Left, headed by Leon Trotsky, Bolshevik Minister of War and Marine, and Bukharin, editor of the newspaper Pravda, is growing. The party of the Right proposes to rob the state of trade unionism, which would be enforced upon all workers, while the Left demands a continuation of the military dictatorship.

He adds that a third party is working secretly for the establishment of external government.

RUNAWAY GIRLS SENT TO VANCOUVER HOMES FROM TACOMA

Tacoma, Aug. 20.—Two young girls, whose names are withheld by the police, were picked up last evening as runaways and put aboard a train for their homes in Vancouver, B. C. They were taken into custody on descriptions received from the Vancouver police, which were later confirmed over the long distance telephone. They left Vancouver yesterday, it is understood here.

Britain Formally Accepts Invitation To Big Conference

Reply to Harding Couched in Cordial Terms; In Their Reply Japanese Are Expected to Reiterate Position Recently Outlined.

London, Aug. 20.—Great Britain's formal acceptance of the official invitation of President Harding to participate in the conference on Far Eastern questions and disarmament in November next has been forwarded to the American Government, it was announced here to-day.

The British note is couched in cordial terms of approval of the objects for which the conference has been called, it was added.

Tokio, Aug. 20.—Japan's formal answer to the American invitation to participate in the conference on disarmament and Far Eastern questions was discussed by the Cabinet yesterday, but it is probable its dispatch to Washington will be delayed a few days. At present it is forecasted that the reply will be in the nature of a reiteration of the position of Japan, which has been stated in formal news sent to Washington.

Lord Bryce Declares Europe Must Disarm Or Face Ruination

Williamstown, Mass., Aug. 20.—Europe faces the alternative of reduction of armaments or ruin, Viscount Bryce asserted in a lecture at the Institute of Politics here last night.

The great European countries are already beggared by the last war," he said. "It is plain that they will be ere long ruined by the continuance of expenditure on the present war scale. They ought therefore to welcome the invitation which has proceeded from the United States to a conference on the subject as it has already been welcomed by the people of Britain and the Dominions of the Empire everywhere."

He said that only an agreement between the great powers held out any hope of armament reduction.

U. S. CRAFT HELD ON THE FRASER

Liquor Was Seen Being Taken Aboard

Steveston, B. C., Aug. 20.—The American cruising steamer Yankee is tied up at New Westminster with a truckload of liquor on board as the result of an alleged attempt to smuggle whisky on board here on Thursday evening. The liquor is valued at some \$2,000.

The little cruiser came up the Fraser River after dark on Thursday and Customs Officer John E. Murchison and a local police constable watched her dock at the Steveston wharf at midnight. Scouting "whisky," they remained on watch until a truck loaded with a large number of sacks and accompanied by an automobile with half a dozen passengers came up and ran down to the wharf.

THEIR STATEMENT

When the "sacks" were all on board Murchison stepped out from his hiding place and casually inquired why the arrival of the little craft had not been reported to him. "The men replied that the boat did not belong to them."

The customs officer made sure that the sacks contained liquor and decided to hold the vessel on behalf of the Federal authorities. Yesterday she was taken to New Westminster, where she is still being held.

WINDSOR, ONT., AUG. 20.—JUDGMENT AGAINST THE BRITISH-AMERICAN BREWING COMPANY, ON A CHARGE OF UNLAWFULLY SELLING 20 CASES OF BEER CONTRARY TO SECTION 40 OF THE O. T. A., WAS HANDLED BY MAGISTRATE GUNDY IN WINDSOR POLICE COURT TO-DAY. A FINE OF \$200 WAS IMPOSED. THE CASE WAS THE SECOND TEST TRIAL BROUGHT ABOUT BY ATTORNEY-GENERAL REEY IN AN EFFORT TO STOP THE EXPORT OF BEER TO THE UNITED STATES.

ONTARIO FIRMS TO EXPORT LIQUOR TO UNITED STATES

Ottawa, Aug. 20.—(Canadian Press)—Notice of incorporation of the Sandwich Export Company, Ltd., and the Border Export Company, with capital of \$100,000, to carry on business in the city of Windsor as exporters of liquors and all other commodities, appear in this week's Canada Gazette.

The other incorporations published this week include the Economic Mfg. Powder Sales, Ltd., Vancouver, B.C., with a capital of \$200,000.

FARMERS' SUN SAYS FEDERAL ELECTION COMING

Toronto, Aug. 20.—The Farmers' Sun claims to have been informed from sources, which are almost "unquestioned" that there will be a Federal general election within two months. A formal announcement to this effect is expected to be made, it says.

URGES CREDIT OF CANADA BE USED

D. Loughnan Has Scheme to Overcome Depression

Ottawa, Aug. 20.—(Canadian Press)—Selling goods at half price to the consumer and reimbursing the retailer for his loss by the issue of Treasury notes through the Federal Department of Finance is the scheme advanced by David Loughnan, editor of The Veteran, to cope with industrial depression and consequent unemployment. He claims that in this way the credit power of the nation would be extended to the immediate consumer.

In justification of his proposal, Mr. Loughnan points out that under the tariff the taxing power of the community has been used to build up Canadian industries. Is there any valid reason, he asks, why the credit power of the community should not be drawn upon to keep industries running at capacity in producing Canadian-made goods by Canadian workmen for Canadian consumers? As a conclusive argument in favor of his scheme Mr. Loughnan declares that production without employment, as at present, must inevitably close the wheels of industry.

A SALIENT

Mr. Loughnan to-day set for publication a treatise on unemployment under the caption "The Ypres Sill of Employment." In it Mr. Loughnan declares that the country now faces a greater problem than that of winning the war, and lacks the sign of the three great factors necessary for a successful issue—unity, unselfishness and optimism. Methods of meeting the situation now in vogue "merely scratch the surface," he declared, and leave the situation worse than before. Mr. Loughnan predicts that during the coming winter more than 300,000 of the workers of Canada will be without work unless immediate steps are taken to meet the situation.

OTHER INCORPORATIONS

The other incorporations published this week include the Economic Mfg. Powder Sales, Ltd., Vancouver, B.C., with a capital of \$200,000.

LESS FIGHTING IN MOROCCAN ZONE

Lull in Hostilities Between the Spaniards and Tribesmen

Madrid, Aug. 26.—Fighting between Spanish troops and rebellious tribesmen in Morocco seems to have died down for the moment at least.

The Minister of War announced that the news from Melilla yesterday was without importance.

Ten thousand square kilometres of the Spanish zone remained to be captured when the Spanish troops in the Melilla suffered their reverses at the hands of the Moors late in July. The entire region was overrun by fanatic tribesmen ready to fight to the last for their inhospitable land.

The strength of the Spanish forces with their native auxiliaries engaged in this formidable task before the Spanish disaster had been the subject of criticism even among the soldiers participating in the effort to pacify the Moors and a correspondent of The Associated Press heard on many occasions cutting remarks as to the peril of leaving small garrisons to defend newly acquired positions. It was pointed out that the tribesmen were able to assemble in considerable force at any given point with remarkable rapidity and a lone garrison was liable to be cut off and overwhelmed before help could be secured from another point.

Occasional Victory.

Such, however, was the situation and the high commissioner with the generals under his command was compelled to make the best of things while trying to satisfy Spanish ambitions with the report of an occasional victory.

Meanwhile, it was charged, the tribesmen were able to maintain their supplies of food and arms either from French Morocco or through the international zone at Tangier. By this means they were enabled to offer stern resistance to the Spaniards in their effort to take and hold the country lying between Melilla and Ceuta, a distance of 250 miles in a direct line, every inch of which must be fought for.

Much help could not be expected from the small Spanish war vessels patrolling the coast, to which approach is very difficult and dangerous, while bombardments from the warships would probably prove ineffective, because of the impossibility of seeing the object aimed at owing to the roughness of the ground.

EMPLOYMENT FIGURES IN U. S.

Washington, Aug. 26.—Increases in the numbers of persons employed in July over the number employed in June were shown in eight out of four-

EDUCATION PLAN IN PALESTINE

New Era Has Found School System

London, Aug. 26.—So comprehensive is the education of the Government of Palestine that, at the present rate of progress, the whole country will be provided with schools within four years, it is announced here.

Since January, thirty-four new village schools, providing elementary education for 1,360 children, have been opened, while forty-six state-aided schools provided in villages by the inhabitants have been taken over by the Government. An additional thirty-five schools will be opened during the current financial year, it is announced.

Measures also are being taken for the development of the two training colleges for teachers. Teachers are also being appointed to live among the Bedouin tribes and teach their children.

A local education committee has been formed, consisting of four Moslems, three Jews and three Christians. Under the arrangements now in force the people of the villages provide the buildings and furniture and keep them in repair, while the Government pays the salaries of the teachers and other costs of maintenance.

STEEL INDUSTRY WILL BE CHANGED, SAY JAPANESE

Tokyo, Aug. 26.—A new process by which sand iron, or magnetic sand, may be converted into pig iron and thence into steel has just been made public by Goro Matsuzawa and Dr. Asebu Naito.

The discovery, the scientists say, will revolutionize the steel industry of the world. The process is carried out by means of combining the sand iron with coke, using hot gas flames and making ferro-coke, from which iron can easily be taken.

BOLSHEVIK GOLD FORWARDED TO CONSTANTINOPLE

Constantinople, Aug. 26.—Russian Bolshevik gold valued at \$1,000,000 has arrived here during the last fortnight as a result of trade exchanges. Of this amount, \$600,000 worth was brought by the United States destroyer Overton from Batum, from the American Foreign Trade Corporation. This organization secured the money as a revolving credit from the three Caucasus republics and it will be used for the purchase of manufactured goods for which raw imports will be exchanged.

EPIDEMIC OF DYSENTERY

It affects many people more in winter than in summer—in the one case it is due to improper eating—in the other, to congestion, excited by cold. A small dose of good old Nerville repeated a couple of times usually removes the trouble very promptly. If there is pain, relief is almost immediate. For cramps, colic, stomach pains and the like, Nerville in sweetened water is certainly a wonder. 25c at all dealers.

FRENCH TELEPHONE SERVICE DEFICIT

Paris, Aug. 26.—The deficit of the French telephone service, which is run by the state, will amount to over 200,000 francs for this year, according to Louis Deschamps, who was Under-Secretary of State for the Department of Posts, Telegraphs and Telephones in the previous Cabinet.

M. Deschamps says the service needs an expenditure of 1,500,000,000 francs for improvement and extension and recommends the state, if it cannot do so, to this outfit, to "hand" the service back to private companies and let them reorganize it.

FLIGHT MADE BY CANADIAN PLANE

Halifax, Aug. 26.—Travelling part of the way at a rate of more than 100 miles an hour, the gigantic Canadian hydrocopter piloted by Col. Robert O. Leckie from Ottawa to Halifax made the last leg of its journey from Fredericton, N.B., to the air station here yesterday.

The whole flying time of the trip of 840 miles was approximately nine hours and forty-five minutes. It was a most successful and uneventful voyage, according to five passengers who accompanied Col. Leckie.

The largest seaplane in Canada has been brought to Halifax to take part in the combined naval, military and air manoeuvres here next week.

When Does Bronchial Trouble Begin to Get Serious?

First it was a little throat tickle, then a cough which grows severe. This neglected cough travels down the lungs, and it's mighty hard to treat. To treat throat trouble right, use Catarrhose. It heals the sore spots allays irritation, eases the cough makes breathing regular, clears out the phlegm and frees the nostrils from crusts and accumulations. You can prevent colds, and keep free from Catarrh and bronchial trouble by frequently using Catarrhose—thousands prove this everyday. Sold everywhere; two months' treatment, \$1.00; medium size, 50c; small size, 25c.

MANIFESTO TO TRADE UNIONISTS

London, Aug. 26.—A remarkable manifesto has been addressed to trade unionists by members of Parliament, comprising an equal number of Labor members and Unionists. It declares that trade unionism no longer serves its original purpose, but is being used as the instrument of extreme political views.

"We need co-operation, and not class war," says the manifesto. "We want arbitration, not anarchy. It is made to appear that everyone holding a union card favors socialism of production and exchange. The trade union movement is in danger of being weakened to the point of uselessness. The strike of ship joiners, which has extended since last November, has been concluded, the men returning to work on the terms offered them some months ago."

CONFESSED PLOT STORY WAS UNTRUE

Man Made Novel Attempt to Get to New York

Kansas City, Mo., Aug. 26.—Sam Harris, a restaurant waiter, who late yesterday signed an affidavit to the police that he was one of several gunmen employed by a wealthy New York man to kill a Mrs. Stillman, confessed last night, plot announced, that his story was fictitious.

Harris was arrested at the office of a local afternoon newspaper which yesterday published his story in a copyrighted article.

He told the police that he was anxious to get back to New York and thought his story would be sufficiently plausible to warrant his return there by the authorities.

Chicago, Aug. 26.—Mrs. James A. Stillman, of New York, visiting at the Harold F. McCormick home at Lake Forest, was guided last night following revelation of an alleged plot to kill her for \$25,000.

Mrs. Stillman, reported suffering from a nervous breakdown as a result of the hearing of the suit for divorce against James A. Stillman, wealthy New York banker, when informed of the alleged plot was reported to have refused to believe it.

"The man must be demented," she said when told of an alleged confession of Sam Harris at Kansas City, who later admitted that his story was fictitious.

Guards were placed about the McCormick home last night, however, as a precautionary measure.

Mrs. Stillman is accompanied here by her son Guy.

SEATTLE MAY HAVE TRACKLESS TROLLEY CARS

Seattle, Aug. 26.—Trackless trolley cars for First Avenue and First Avenue South, replacing existing street cars and obviating necessity of large expenditure for new rails in connection with the contemplated paying there, were proposed yesterday afternoon by Mayor Caldwell in a letter to the City Council.

The trackless trolley is an innovation in street car transportation, in use in some cities at the present time, and which has been successfully demonstrated recently in Sebecetady, N. Y., according to the Mayor. It combines the advantages of automobile street cars, being a trolley car or bus propelled by electric current, carried in a wire above the street, but the absence of tracks makes it possible for the car to move from curb to curb and avoid traffic as occasion may arise.

From the statement of figures given out by engineers of the General Electric Company, the Mayor said, it appears that the operating cost of a mile of the trolley buses is about 18 cents, whereas that of gasoline buses is 28 cents.

According to our last street railway report it is costing us about 28 cents a mile for our street car system. If these figures are correct we see that there would be quite a saving by installing the trackless trolley bus on First Avenue.

CHICAGO UNION USED VIOLENCE

Chicago, Aug. 26.—Because he refused to pay \$50 to join the Milk Wagon Drivers' Union as a fine for failing to join sooner, Felix Rosowski, owner of a small dairy, had his plate-glass shop window smashed on five different occasions, his skull fractured, his face cut and three shots fired at him from a dark alley. Rosowski told his story to the county grand jury yesterday and another indictment of several officers of the union is expected to follow. Three officers of the union were indicted last week on charges of intimidating customers and small dealers.

"We need co-operation, and not class war," says the manifesto. "We want arbitration, not anarchy. It is made to appear that everyone holding a union card favors socialism of production and exchange. The trade union movement is in danger of being weakened to the point of uselessness. The strike of ship joiners, which has extended since last November, has been concluded, the men returning to work on the terms offered them some months ago."

ANOTHER VICTIM OF RHEUMATISM

Entirely Well After Six Weeks' Treatment With "FRUIT-A-TIVES"

MR. AMEDEE GARCEAU.
32 Hickory St., Ottawa, Ont.

"I was for many years a victim of that terrible disease, Rheumatism. In 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.

I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again. I look upon this fruit medicine, 'Fruit-a-tives,' as simply marvellous in the cure of Rheumatism and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial."

AMEDEE GARCEAU.
50c. a box, 6 for \$2.50, trial size, 25c.

LEADERS OF PRESS TO SPEAK AT COMING CONGRESS

Some of the Delegates to the Forthcoming Press Congress of World

Honolulu, Hawaii, Aug. 26.—Announcement of the tentative list of speakers at the business sessions of the Press Congress of the World to be held at Honolulu from October 11 to 25 has just been received from the office of President Walter Williams, at Columbia, Missouri.

The speakers who are to have places on the formal programme and who will lead in the discussions that are to be a feature of the Congress sessions, are recognized leaders of the profession. They represent the highest type of many fields of journalism and they will bring together at Honolulu the most advanced thought of many nations.

The list of the speakers who will attend and address the Congress is necessarily incomplete as yet, since only the names of those who positively will appear on the programme have been or will be announced. Among those who will be heard are the following:

E. E. Brodie, of Oregon City, Oregon, U.S.A.; President of the National Editorial Association; H. L. Bridgman, of the Standard Union, Brooklyn, N. Y., U.S.A.; Virgilio Rodriguez Beteta, of Guatemala City, Guatemala, who will represent the Press Association of Central America; James Wright Brown, owner of Editor and Publisher, New York City, U.S.A.; Joe R. Chapple, editor of National Magazine, Boston, Mass., U.S.A., who will speak on "The Editorial Crow's Nest"; Mark Cohen of The Evening Star, Dunedin, New Zealand; Thales Coutoupis, editor of Nea Ellas, Athens, Greece; B. W. Fleisher, owner of The Japan Advertiser and Trans-Pacific Magazine, Tokyo, Japan; M. Honda, of Tokyo, Japan; Prof. W. D. Hornaday, head of the journalistic department of the University of Texas, U.S.A.; B. G. Horniman, president of the Press Association of India; Harvey Ingham, publisher of The Register and Tribune, Des Moines, Iowa, U.S.A.; Col. Edward Frederick Lawson, D.S.C., M.C., assistant managing proprietor of The London Daily Telegraph, who will represent the Newspaper Proprietors' Association and the Empire Press Union of Great Britain.

Gregorio Nieva, editor of The Philippine Manila, P. I., who will speak on "The Press in the Achievement of Human Purposes in the Far East."

Prof. Walter B. Pitkin, of the School of Journalism, of Columbia University, New York City, U.S.A.; Ludvig Saxe, of Christiania, Norway, who will represent the Norsk Presseforbund, the national press association; James Schermerhorn of The Times, Detroit, Michigan, U.S.A., who will read a paper on "The Journalism of the United States." Such a paper from every country represented in the Press Congress will be presented.

Dr. H. Schoop, of Neue Schweizer Zeitung, Zurich, Switzerland; Vicente Sotto, editor of The Independent, Manila, P. I.; William Southern, Jr., of The Examiner, Independence, Missouri, U.S.A.; Henry Stead, editor of Stead's Reviews, Melbourne; Major Alexander Steven, proprietor of Northumberland and Berwickshire Newspapers, England; K. Sugimura, of The Asahi Shimbun, Tokyo, Japan; Hollington K. Tong, of Peking, China; Ruston N. Vatchaghandy, of San Vartaman, Bombay, India, who will speak on "Indian Journalism"; Hin Wong, of The Canton Star, Canton, China, who will speak on "Why Not Also a Journalistic Mission to China?" and Motozada Zumoto, editor of The Herald of Asia.

TWO KILLED.

Preston, Minn., Aug. 26.—Pilot Herbert Riebe, twenty-seven, and C. Bright, his passenger, were killed in a 2,000-foot fall in an airplane here late yesterday.

TRADE IN PRECIOUS STONES FALLS OFF

Dealers in Germany Facing Financial Crisis

Trade in precious stones in Germany has experienced such a slump in the past twelve months that many of the jewel dealers are facing a serious financial crisis, according to Berlin experts who have been investigating the causes of an unusual situation, says an Associated Press mail dispatch from Berlin.

The diamond markets are especially threatened, for the men and women who made much money during the war and invested heavily in diamonds, recently have been selling brilliant stones extensively, while the old families of established wealth, upon which the trade once depended, have ceased to buy. It is said 50 to 60 per cent of those who brought jewels with war profits in Germany and England have either sold their purchases or offered them for sale within the last few months.

Artificial Stones.
The synthetic diamond, as well as the artificial ruby, sapphire and spinel, also has been marketed to the detriment of the trade in legitimate stones, not only because many artificial stones are sold as genuine, but because the artificial jewel is preferred by many because it is less expensive, and often can be differentiated only by the connoisseur.

The business in synthetic stones has grown immensely during the last few years, with Germany and France the principal competitors and Switzerland a close third. Raw materials for the manufacture of the artificial ruby, which is accomplished by an electrical process, are purchased by Swiss manufacturers from Germany, which has handicapped Switzerland in the race for control of the world market.

Higher Prices.
Although the production of artificial jewels has greatly increased, the prices have risen, which fact is attributed by the experts to the improved technique. Prices of synthetic rubies and sapphires have increased twentyfold over pre-war prices.

Owing to the stagnation of the trade in genuine diamonds a number of the largest importing houses have ceased importations from South Africa, where their chief supply was secured, and others have greatly reduced their purchases of raw diamonds.

When Your Appetite Fails This Is What You Need

When the very thought of eating makes you feel dizzy, when you're run down, stomach in bad shape—you need a real housecleaning with Dr. Hamilton's Pills. They open up the liver, assist the stomach and improve digestion. The taste becomes aware of new flavors in food you never noticed before. You'll look and feel a whole lot better after using Dr. Hamilton's Pills. Many folks used this fine old remedy and nothing else and kept in the pink of condition all the time. 25c at all dealers, or The Catarthosone Co., Montreal, (Adv.)

Internal and External Pains are promptly relieved by DR. THOMAS' ECLECTRIC OIL

THAT IT HAS BEEN SOLD FOR NEARLY FIFTY YEARS AND IS TO-DAY A GREATER SELLER THAN EVER BEFORE IS A TESTIMONIAL THAT SPEAKS FOR ITS NUMEROUS CURATIVE QUALITIES.

Green Forests are an investment which gives big returns.

The shareholders include, directly or indirectly, every citizen in the Province.

Dividends are shared directly by every individual who resides in British Columbia.

Each tree is worthy of preservation, and means employment to someone, sooner or later.

No timber substitute has been found, but timber provides substitutes for many articles.

The Lumber Trade is called the barometer of British Columbia prosperity.

Keep the mark set high; destruction of the Forest spells loss for everybody.

AIDING INDIAN CHILDREN TO RETAIN HEALTH

Growers Are Busy Gathering Sweet Pea Seed

Duncan, Aug. 19.—At a meeting on Tuesday afternoon at the agricultural office of ladies representing the various organizations it was decided to help the Agricultural Society with the catering at the fall fair next month. Mrs. Edward Stock will take charge of the buying and general supervision. The King's Daughters, the Cowichan Chapter, I. O. D. E., the women members of the Agricultural Society, the Women's Institute and the Methodist Ladies' Aid will take charge of the serving and waiting at different meals.

The G. W. V. A. band, of Victoria, will be in attendance on Saturday.

Mr. and Mrs. George Powell are visiting relations in Cowichan. Mr. and Mrs. Carr-Hilton are spending cricket week in Victoria.

The picking of sweet pea seed is in full swing at the various places. About twenty growers have taken up this pleasant industry this year. Several have sub-contracts from the Crosland Bros., who have never grown enough to fill their orders for English and American firms. A few growers are dealing directly with the seed houses. The rain at the beginning of the week, which was beneficial to so many crops, gave the pickers a slight setback, but was not sufficient to do any real harm. Tomato and vegetable and root crops are good. Outdoor grown tomatoes are coming into market. Apples and plums are an unusually light crop in Cowichan, put down by some growers to the late spring rains, which are also held responsible for the light honey crop. The bees owing to the cool, wet spring

were not about to take advantage of the maple and other early blossoms.

The directors of the Women's Institute will hold their first meeting after the vacation on the last Tuesday of August. Committees have been formed and everything is in line for the beginning of work on the Women's Institute exhibit at the Fall fair, samples of old and new work of every kind done by women will be in this display.

The programme for the next general meeting of the Institute will be music. The furnishings of the rooms are to be renovated.

A meeting of the Cowichan Health Centre Committee was held on Wednesday afternoon in the rooms of the Women's Institute. Duncan, with Mrs. Moss, O. B. E., in the chair, Mrs. Steen from Cobble Hill, Mrs. Owen from the South Cowichan Red Cross, Mrs. Pitt, treasurer, and Mrs. Whidden, secretary, were present.

The meeting was a special one to consider the extension of the work, particularly the establishment of a dental clinic.

Mrs. Moss reported on interviews with Dr. Young, of the provincial health department, with the Red Cross officers and officers of the Indian department.

July has been a month full of active work for the public health nurse, Miss Hardy. There are a great many Indian reserves in Cowichan, and the health of the Indians is a matter of public importance, which may vitally affect others. The public health nurse has been called upon several times to help Indian children, and as the Indian department may provide ensuring help, it was urged that steps should be taken to co-operate with the Indian department. In the interests of public health, the Red Cross Society, the Provincial Health Department and the Indian department will be urged to give their support to the employment of a most necessary second public health nurse, and to stand behind the successful operation of a dental clinic.

Mrs. Whidden reported that Dr. Lewis Hall, of Victoria, who was at one time a resident of Cowichan, had kindly donated a dental chair, valued at between \$300 and \$400 to the Cowichan Health Centre. The chair

THE CAUSE OF BACKACHE

Only in Rare Cases Does Backache Mean Kidney Trouble.

Every muscle in the body needs constantly a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment, and the result is a sensation of pain in those muscles. Some people think pain in the back means kidney trouble, but the best medical authorities agree that backache seldom or never has anything to do with the kidneys. Organic kidney disease may have progressed to a critical point without developing a pain in the back. This being the case, pain in the back should always lead the sufferer to look to the condition of his blood. It will be found in most cases that the use of Dr. Williams' Pink Pills to build up the blood will stop the sensation of pain in the ill-nourished muscles of the back. How much better it is to try Dr. Williams' Pink Pills for the blood than to give way to unreasonable alarm about the kidneys. If you suspect your kidneys, any doctor can make tests in ten minutes that will set your fears at rest, or tell you the worst. But in any event to be perfectly healthy you must keep the blood in good condition, and for this purpose no other medicine can equal Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail at 20 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

is so adjusted that it may be carried in a motor car. The Cowichan Health Centre has been established just one year ago. A full report of its activities is being prepared. Dr. Young is so pleased with its working that after the term of university training for public health nurses will be sent in relays to get their practical experience under the local public health nurse.

BOY SCOUTS SPEND ENJOYABLE TIME AT MILL BAY

Cobble Hill, Aug. 19.—The Cobble Hill Boy Scout Troop broke camp on Thursday afternoon. They had an enjoyable week at Mill Bay, where they had plenty of fishing, boating, swimming, cricket and other games. The work accomplished by the Troop in Scouting is as follows:

August 16 Scout N. Robinson passed from his tenderfoot to Second Class Scout and swam his fifty yards for the Swimming Badge.

Scout C. B. Meredith, Patrol Leader of the Eagles, passed his signalling test on August 13. Cooking test on August 14, for a first-class Scout on August 17 he passed for the Swimmer's Badge; he also trained J. D. H. Slater for a tenderfoot, who was examined and passed by A.S.M. T. Keene.

Scout G. R. Barry on August 16 passed his first-class cooking test, also his Swimmer's Badge; he trained J. Barry for a tenderfoot, who on August 18 was examined and passed by A.S.M. T. Keene.

Scout C. B. Keene trained W. Bird for a tenderfoot, who on August 14 was examined and passed by A.S.M. T. Keene. On August 14 W. Bonner and John Barry passed their Wolf Cub Tenderfoot Test. C. B. Meredith is now Acting Cub Instructor.

Visits were paid to the camp by the parents of the Scouts, also on Saturday, August 13, C. J. Cherry Scoutmaster of St. Mary's Troop, Victoria, visited the camp, where he acted as examiner for the Swimmer's Badge, and he helped in other ways to put the boys on in their work as Scouts.

On Monday, August 15, Mr. Wright, a Cubmaster from Duncan, camped with the Scouts over night. The Troop has decided that each Scout shall pay \$25 a month to cover the annual camp and badge expenses. The trustees of the Mill Bay School have kindly offered the old school room for Troop headquarters, which the Scouts are glad to accept.

In breaking up camp Acting Scoutmaster G. E. Bonner congratulated the Boy Scouts for the excellent work they had accomplished in passing their tests during camp, which showed that great interest must have been taken in the previous week. He has been able to do this work and he hoped that they would continue to be prepared.

The next meeting will be at Troop headquarters on Saturday, August 21.

Sayward, V. I., Aug. 17.—There have been a number of parties in the valley during the past week looking for land, and all express themselves as being favorably impressed with the district. C. Fillmore, of Vancouver, has purchased twenty acres, and other sales are reported to be pending. Improved places are what are inquired for. While there are thousands of acres of farming land lying idle, which is mostly held by absentee owners, there are very few

PERRIN'S
GLOVES

Your Fall Coat and Costume Madam!

The Autumn chill in the air and the Autumn tints gradually appearing give sufficient hint that, afforded the proper opportunity and selection, it is time to purchase your Fall garments. Our show-rooms have many early shipments for your inspection, and the variety of styles and shades and prices offers a satisfactory opportunity to the early buyer.

SUITS

The new suits include models in taupe cloth, satin lined, with mole collar and patch pockets, handsomely embroidered, with tie effects; navy broadcloth suits, coats, three-quarter length, semi-fitted beaver collar and handsomely beaded; navy suits handsomely embroidered, with mole and beaver collars, with and without belts.

COATS

Many up-to-the-minute styles in Fall coats, with loose back, also belted and semi-fitting backs; handsomely trimmed with mole, seal and beaver, opossum and coon. These come in a variety of beautifully soft Autumn shades.

DRESSES

A dress of Poiret twill, smartly tailored, will make a striking costume for early Fall wear. Worn with a clever fur choker and jaunty turban, nothing makes so effective a street costume. Our range of dresses includes an excellent selection in tricot, serge and Poiret twills, handsomely embroidered, beaded and braid trimmed. Styles include long tunic effects and straight lines predominate.

Blouses That Spell Daintiness

After the Summer, with its insistent series of sales, is over, one begins to crave for something new, something fresh—some novelty that indicates the opening of a new season. The new blouses, with their crisp freshness, are designed to satisfy that craving. Our early shipments include many pretty designs and dainty materials, featuring novelties in beading and embroidery.

Over-blouses are strongly in evidence this Autumn. These come in heavy crepe de Chine, with round neck, also the new boat-shaped neck; short sleeves; in white, flesh and navy. Others feature the new collar and are trimmed with contrasting colors, in shades of sand, navy, white, grey and black. Heavy crepe de Chine tailored blouses with tucked front, convertible collars, in sand, grey, brown, flesh, white and coral.

Gloves and Corsets as Accessories

In both departments we are ready to take care of your Fall requirements. Our very complete stocks and experienced assistants will make your buying a pleasure and your selection easy.

Improved places for sale in the district. Miss Beth Robertson, of Vancouver, is visiting here, the guest of Mr. and Mrs. Andrew Brown.

A very enjoyable dance was given by the Bachelors in Bay View Hall on Saturday evening, and a very large number attended, including a party of visitors from Hardwick Island. G. Brookshaw, E. Williams, L. Prux, and G. Lawson, who had charge deserve great credit for the able manner they attended to the wants of their many guests. Mrs. J. Lewis had charge of the supper arrangements.

Mrs. C. Wilson and family of Cedar Cottage, are spending a few weeks in the valley, the guests of Mr. and Mrs. J. Long.

Mr. A. Mackay, of Vancouver, is spending a few days here. Mr. Mackay is interested in the copper mine here.

Mr. G. Browning and family arrived on Tuesday's boat. Mr. Browning has purchased 166 acres of land here. After inspecting the southern portions of the island and Lower Mainland he decided that Sayward offered the best inducements to those who desired to enter the farming business and who had an eye to the future. Mr. Browning has been a resident of North Vancouver.

Mrs. Hugh Jameson, widow of the late Hugh Jameson, of this place, returned on the last boat. The weather during the past week has been perfect. Haying is over and the cutting of the oats and wheat has commenced. A good rain fell here on Aug. 16, and the second crop of clover has made a growth of fifteen inches.

Mr. J. Whalen, of the Whalen interests, who has been spending some days here has returned to Vancouver.

Thomas Menzies, M.P.P.; Capt. J. W. Troop, Thomas Graham, general superintendent of the Canadian Collieries (Dunsmuir), Ltd.; Charles Graham, district superintendent; A. McKinnon, president; J. Sutherland, vice-president of the Cumberland Board of Trade; J. N. McLeod, president of the Courtenay Board of Trade, and many other prominent citizens of the district.

BOARD OF TRADE PICNIC.
Courtenay, Aug. 19.—The Board of Trade picnic, which was to have been held at Kye Bay, near the Lazo wireless station, was at the last moment postponed on account of the weather. Great interest has been manifested in this event, which will now take place on Wednesday next.

CREAM Cheese is cheese in its most nourishing form. It possesses from 1/5 to twice the energy value of other forms of cheese and goes further.

Ingersoll Cream Cheese

is so pure—so rich and of such a creamy consistency that it "Spreads like butter."

"Can be used in a hundred different ways"

B. C. Distributors—Urquhart & Co. Limited, 84 Powell St., Vancouver, B. C.

Will the New Tariff Bill Start Business Booming?

The effect upon American industry being the most important question in the minds of men who are drafting the new tariff law, it is essential that spokesmen for industry let their representatives in Congress know what they think the effect of the proposed schedules will be. In order to help the Senators, who are toiling so diligently during these torrid weeks in Washington, THE LITERARY DIGEST has asked a number of representative trade journals to tell just what effect they believe the schedules under consideration will have on their respective industries; whether they will help to restore prosperity, and whether they will tend to raise or lower prices. These opinions covering a wide field of industry are presented in the leading article in THE LITERARY DIGEST this week. While The Manufacturers News, Chicago, thinks that the Fordney Bill may have its weak spots and that "it may be well to iron out some of its schedules," nevertheless, "the principle back of it apparently has the approval of nine-tenths of the factory owners of the land," it seems to Raw Material, New York, that the Fordney Bill "appears to have no friends at all, but enemies by the millions." Retail Selling, Oklahoma City, asserts that a tariff like the one being drafted "will greatly increase the cost of living." These are but typical of many opinions expressed in this informative article.

Other news articles of more than ordinary interest in THE LITERARY DIGEST this week, August 20, are:

their summer home, 1824 Rockland Avenue. About seventy-five guests were present. Following tea, which was served in the dining-room at a table charmingly arranged with flowers and lighted candles in silver candelabra. Mr. Cecil Fanning, the well-known baritone who is the guest of Mr. and Mrs. Turpin, de-
lighted the guests with a catholic programme of vocal music.

Mr. and Mrs. E. A. Brydson-Jack and family arrived from Ottawa, and spent a few days in Vancouver visit-
ing Dr. Brydson-Jack, Angus Avenue, before leaving for Victoria, where Mr. Brydson-Jack will be superintending engineer for the Dom-
inion works—Vancouver Province.

Mrs. E. Flaherty, buyer of ready-to-wear and millinery for Gordon's, Ltd., Yates Street, returning to the city yesterday from a five weeks' buying tour of the eastern fashion centres including New York, Chicago, Montreal and Toronto.

Mrs. J. Devitt, Mrs. B. W. Devitt and family and Mrs. Campbell, of Westholme; J. A. Turnbull, of Ban-
field; G. J. Beck, of Centre Island; J. E. Moore and family; Norman N. Moore and family; R. New-
ham and family, of Nanaimo; Frank A. Varsell, of Quamichan Beach; Mrs. Fraser and son, Union Bay; Edgar Miles, of Shaganappi Lake; Lorenson, of Jordan River; John Reid, of South Salt Spring Island, are up-island visitors, staying at the Dominion Hotel.

Miss J. Mack and M. Mack, of Regina; Mr. and Mrs. St. John, of Ed-
monton; W. Brown and Mrs. Brown, of Calgary; D. Wilson, of Ban-
croft, Ont.; Mrs. Norma N. Stevens, of Chatham, Ont.; F. Noos-
ter, of Toronto; Mrs. E. B. Irving, Mrs. L. Dickie and family, of Na-
naimo; J. F. Maine and family of London, Ont.; new arrivals at the Dominion Hotel.

The ladies of the Metropolitan Methodist Church choir spent an en-
joyable time yesterday afternoon at the home of Mrs. D. Sherritt and Mrs. Lewis, 1532 Quamichan Avenue. The guest of honor was Mrs. Kinsley Yeo, who will shortly leave with her husband for Van-
couver to reside. During the after-
noon Mrs. G. A. Downard on behalf of the ladies presented Mrs. Yeo with a handsome silver basket filled with Ophelia roses, also an Oriental parch-
ment inscribed with a "Prayer to Allah," and the autographs of the donors. Although regretful at losing such a highly-esteemed friend, the ladies expressed their sincere wishes for her happiness and success in her new home. Refreshments were served. The reception rooms were prettily arranged with flowers in a decorative scheme of mauve and yellow.

ATTENDED OPENING OF NEW INSTITUTE

Mrs. V. S. MacLachlan Back From Mainland; Women's Institutes Active

The Women's Institute movement is perceptibly growing in British Columbia and a few rural districts but now have an institute with its busy members of energetic women. Mrs. V. S. MacLachlan, of the Department of Agriculture, returned to the city yesterday from the Mainland, where she attended the inaugural meetings of the Otter District Women's In-
stitute in the Langley municipality. En-
thusiasm ran high at the opening meetings, which included the formal inauguration, followed by a general meeting at which the hall was well filled. Child welfare and school betterment will be the chief work of this new organization.

While on the Mainland Mrs. Mac-
Lachlan attended the baby clinic arranged by the Mission City Women's Institute at which thirty-one bonny little specimens of humanity were ex-
amined. Questions put to the mothers as to the mode of feeding and hygiene revealed that milk formed the staple article of diet and that each of the babies slept either out-of-doors or with open windows, showing the value of fresh air to a growing child. The flower show and baby clinic reflected highly to the credit of the Institute members, said Mrs. MacLachlan.

CORVOVA BAY PERSONALS.

Mrs. W. Marshall Paribay and family are spending the Summer months at the Bay.
Mrs. John H. Smythe and family, who have been spending the Summer months at the Bay have returned to their city residence.

What's in a Name?

Facts About Your Name; Its History; Its Meaning; Whence It Was Derived; Its Significance; Your Lucky Day and Lucky Jewels.
By Mildred Marshall.

Spindale, Inc.

ALEXANDRA

Alexandra is a famous name. It is a feminine version of the title of the illustrious conqueror, Alexander the Great. It is all the more con-
gruous sweep, and for years after his triumphant career, it has been a name called after his name. Alexandra was a favorite name in Greece. The Macabean Jews used it, and a mar-
tyred Pope made it a favored name in Italy.
The feminine was brought to Scot-
land by Margaret Atheling, who learned it at the Hungarian court, where she was born and reared. Alex, Alexan-
dra and Alexandra are several of its forms. Alexia is often found as a woman's name in old records and ac-
counted Pope made it a favored name in Italy.
Alexandra is widely popular in Ger-
many and Russia, as well as in other continental countries. It has seldom had much vogue in England, except as a feminine given to perpetuate the mas-
culine Alexander, where there have not been sons to carry on the title. But curiously enough, it is a favorite in the course of the middle ages.
The splendid ruby is Alexandra's tal-
ismanic gem. It is fitting that this emblem of courage and accomplishment, and bodily vigor should be her stone. Thursday is her lucky day and 6 her lucky number.

FOR CHILDREN THE SANDMAN STORY FOR TO-NIGHT

THE OLD-FASHIONED AND THE NEW. Part II.

Betty heard all the silk gowns sigh and came to the middle of the bed as they turned away from the desk. "To think anyone could be so heart-
less," said one. "They have thrown away the beautiful part and left him to suffer."

"Oh, no, I am still beautiful in an-
other way," said the Spinlet Desk, and again Betty saw all the gowns run to the footboard and look over.

"My wood is as handsome as ever," said the desk, "and I am greatly ad-
mired; in fact, I heard the young lady that came here to-night tell Miss Polly that it was a shame to keep me

up here, and that I should stand down in the sitting room or parlor, so I may come into my own again. I may not be in style again, but of course none of you can do that."

"What do you mean?" asked the rustling flowered silk. "We are just as handsome as we ever were."

"That may be, what is left of you," replied the desk, "but you are not whole, you are only bits of what you once were, although to-night you have been able to resume your old forms. You are not well enough that you really are but bits of silk in an old quilt."

Such a rustling as Betty heard. She began to wonder if the old silks might not crumble in shreds, they were so upset, but just then another voice was heard that had not spoken before.

"Come back to your places, all of you," said "Old-fashioned or new, you have a place to fill and why not stay in it?"

It was the black satin border of the silk quilt that had spoken. "Here I came to this quiet place to live just to set off the beauty of all you old-fash-
ioned pieces, and you are jumping out of your places just because someone said you were old-fashioned."

"Why do you not remember what she said? Don't you understand that it is because you are old that you are beautiful?" And up jumped the satin border, and pulled all of the gay silks back into their places.

Betty laughed right out loud, it looked so funny, and then to her sur-
prise she saw the sun peeking in through the shutters. The light up and very beautifully a vocal solo, "The Holy City." Vocal solos were also contributed during the afternoon by Mrs. Lewtas, Mrs. Morton and Miss Agnes Spencer. At the close of the meeting a social hour was greatly en-
joyed, very dainty refreshments being served a fresco.

"All but the black satin border," said Betty, smiling at the thought of her dream.

"What?" asked Aunt Polly.
Betty told her what she had seen in her dream and Aunt Polly laughed until her face was quite red. "Well, I can't rip off the black satin border and leave them without anything to keep them in place. It does need the new-fashioned things to keep the old ones in their places, but if the new-fashioned girl does not hurry and dress the old-fashioned pancakes will

ENJOYABLE FETE AT "ROSEBORO"

Mrs. J. O. Cameron Hostess to Daughters of the Nile Yesterday

Mrs. J. O. Cameron threw open her charming home, "Roseboro," Moss Street, yesterday afternoon for a garden fete in aid of the funds of the Daughters of the Nile, and the popularity of the affair suggests that a handsome sum will be available for the many charitable works under-
taken by the organization. The ideal weather added to the charm of the many attractions arranged in the pretty gardens, and the various stalls were surrounded by patrons through-
out the afternoon.

Mrs. A. J. Gillis, the president, was the general convener of the arrange-
ments, and with Mrs. Cameron, the hostess, welcomed the many guests on arrival. Afternoon tea was served on the lawn and in the house under the direction of Mrs. Hawkins and Mrs. Hannah Brown, assisted by Mrs. C. H. O'Halloran, Miss Ruth Curtis and Miss Jean McNaughton.

"Dorena," the Eastern mystic at-
tracted many clients, a queue wait-
ing outside her tent throughout the afternoon, while the mysterious "cubes" in charge of the Misses Isabella Elliott and V. Dozier with Master Donald Cameron was also a popular attraction. Mrs. "Newar" told fortunes by the aid of the tarot.

Big game hunting with fearsome animals was conducted by Mrs. J. W. Phillips, and her small sons; Mrs. Morrison, assisted by Douglas Hunter, superintended the operations of the spinning jenny; butterfly painting was under the direction of Miss Walker; fancy work, Mrs. Meles and Mrs. Humphreys; candy, Miss Mar-
field, and Donald MacLean and George Cameron presided at the en-
trance. A programme by the G. W. V. A. band added much to the pleasure of the occasion.

In the evening dancing took place in the house, a big crowd dancing to a late hour, to the excellent music furnished by the instrumental trio in-
cluding Miss Marjorie Bell, piano; Ray Kinloch, traps, and Donald Cameron, saxophone.

Metropolitan W. M. S. Met.—The regular monthly meeting of Metro-
politan Methodist Women's Mission-
ary Society was held on Monday af-
ternoon by kind invitation of Mrs. W. J. Whiteley, president of the auxiliary, at her Summer home, Fowl Bay.

There was a large gathering of mem-
bers who were received by Mrs. Whiteley in the grounds under the shade of many beautiful trees, where the meeting was convened. Mrs. G. D. Christie presided, and after devo-
tional exercises and business of the society, introduced Mrs. Cleveland, of Saskatoon, a cousin who has been staying with Mrs. Christie several weeks. Mrs. Cleveland, who is presi-
dent of Saskatoon Methodist Women's Missionary Society, also organ-
izing superintendent of auxiliaries for Saskatoon district, gave a most in-
spiring missionary address, for which she was heartily thanked by another visitor to the meeting was Mrs. Neale, of San Francisco, bringing greeting from W. C. T. U. and invitations to as many as could possibly attend the great W. C. T. U. convention in San Francisco. The last up and very beautifully a vocal solo, "The Holy City." Vocal solos were also contributed during the afternoon by Mrs. Lewtas, Mrs. Morton and Miss Agnes Spencer. At the close of the meeting a social hour was greatly en-
joyed, very dainty refreshments being served a fresco.

EGGAL CUSTARD POWDER

MADE IN ENGLAND
Made from New Laid Eggs. All the nourishment, flavor and freshness of home-made custard. Prepared quickly and without trouble.
Eggal is superior, because it is the only Custard Powder made from New Laid Eggs. As a nourishing food for invalids and children, as a tasty Summer dessert, it is un-
equalled. Give it a trial.

Centuries Recorded By Allen and Ivamy

Yesterday's Cricket Matches Resulted As Expected and Triple Tie Was Created; Teams Playing Off For Championship To-day and Monday; Heavy Scoring By Olbs and Incogs.

Yesterday's results in the Pacific Coast cricket tournament were as follows:

Incogs, 337; Army and Navy, 91.

Olbs, 339; Cowichan, 70.

Wanderers defeated Nanaimo by five wickets.

Victoria defeated Five C's by nine wickets.

Yesterday's matches resulted as expected, and a triple tie was created. Wanderers, Olbs and Victoria succeeded in winning their tussles without any trouble. The day's play failed to solve the tie and arrangements were made to have Victoria and Olbs play off to-day in the semi-finals, the winners to meet the Wanderers for the championship.

Heavy scoring was done by yesterday's winners, the losing sides doing very poorly. Two centuries were recorded, Ivamy, of the Olbs, and Allen, of the Incogs, just managed to squeeze into the select circle. Each batsman recorded 102 not out.

Teams Standing.

The standing of the teams is as follows:	P.	W.	L.	Pts.
Wanderers	5	4	1	8
Olbs	5	4	1	8
Victoria	5	4	1	8
Incogs	5	3	2	6
Nanaimo	5	1	4	2
Five C's	5	1	4	2
Army and Navy	5	1	4	2

BABE RUTH IS NOW THIRD BEST HITTER

Homerun King Has Been on Slugging Bee; Only Heilmann and Cobb Lead Him

Hornsby Still Leads National League, With Twombly As His Runner-up

Chicago, Aug. 20.—Babe Ruth, the Yankee slugger, who registered his 45th and 46th home runs of the season in the farewell series between New York and the White Sox in Chicago, has batted himself into third place among the batters of the American League, with an average of .374. The big slugger has also increased his lead as a run-getter, having registered 124 times.

Harry Heilmann, Detroit, out-fried, suffered a slight slump in hitting, but continues to top the list with a mark of .407. Ty Cobb is the runner-up with .381.

S. Harris, of Washington, added a brace of stolen bases to his string and leads with 22. Other leading hitters:

Slater, St. Louis, .366; Tobin, St. Louis, .365; Speaker, Cleveland, .361; Williams, St. Louis, .350; E. Collins, Chicago, .347; Veach, Detroit, .345; Severid, St. Louis, .340.

HERNANDY SLUMPS SLIGHTLY

Roger Hornsby, St. Louis star, suffered a drop in his batting average during the past week and also lost the honor of leading in runs scored in the National League. Bancroft, of New York, is leading the run-getters, having counted 95 times, while Hornsby scored 92 runs. Hornsby, however, continued to top the batters with .404.

George Kelly, the slugging Giant first baseman, cracked out his twentieth circuit drive, and Frank Frisch, a teammate, added five stolen bases to his string, bringing his total for the season to 39.

Twombly, of Chicago, is the runner-up to Hornsby for batting honors with an average of .371, while Cruise of Boston, batted himself up to third place with .352.

Other leading batters are:

Cutshaw, Pittsburgh, .346; Young, New York, .346; McHenry, St. Louis, .341; Mann, St. Louis, .341; Sigbee, Pittsburgh, .338; Fournier, St. Louis, .339; Nicholson, Boston, .337.

THREE YOUNG STARS BOUGHT BY GIANTS

Baltimore Sells Youngster's for \$150,000; Biggest Deal of Season Completed

New York, Aug. 20.—(Canadian Press)—The New York Giants and Baltimore club of the International League are reported to have figured in one of the biggest baseball trades of the season, in which the New York club is said to have purchased the release of three leading players of the Orioles.

The players are outfielder Larry, pitcher Ogden and pitcher and first baseman Bentley. The latter is the leading batter of the league.

PAID NINE PRIZE

The Giants are said to have paid \$150,000 for the three players who will report to the club at the conclusion of the International League season.

Bentley is the "Babe" Ruth of the International League. He is a good pitcher as well. Ogden is the leading pitcher of the league and has a string of 19 consecutive victories.

RICKARD MAY GET MAXIMUM PENALTY

Prosecution to Ask for Jail Sentence for Violation of Film Laws

Chicago, Aug. 20.—The maximum penalty of a year in prison and \$1,000 fine will be asked for "Tex" Rickard, boxing promoter, who is charged with having defied Judge Landis to put in a charge of violating the federal law prohibiting the interstate shipment of prize fight films, federal officials said yesterday. The evidence will be presented to the grand jury on Monday.

"An indictment will be asked for Mr. Rickard," said John V. Cline, acting United States district attorney. "The court also will be informed that this is his second violation of this law which aggravates the offense."

NEW SWIMMING CHAMP COMES TO THE FORE

Indianapolis, Ind., Aug. 20.—John Weismuller, of Chicago, yesterday won the 20-yard senior free style, A. A. U. swim held here in connection with the Indiana championships. The time was 2:24. Ludy Lager, of Honolulu, was second, and Norman Ross, Chicago, was third.

TORONTO SPORTSMEN DEAD

Toronto, Aug. 20.—The death occurred yesterday at St. Michael's Hospital of Frank J. Walsh, one of the best known sporting men in Toronto. He was connected with the Toronto Rowing Club, also the St. Patrick's Senior O. H. A. Club and other athletic bodies.

Capitals Failed to Back Up Big Hansen

Manager Pitched Splendid Ball But Three Errors at Critical Points Resulted in Tigers Scoring Enough Runs to Win Game; Handley and Hansen Did Half Hitting of Victoria Team.

Tacoma, 6; Victoria, 2.

Tacoma, Wash., Aug. 20.—Errors by Patton, Handley and Shoots at critical periods of yesterday's game allowed the Tigers to win out rather easily. Elmer Hansen, manager of the Capitals, pitched steady ball but his team-mates would not help him out.

On the other hand, the Tigers played errorless ball behind Phil Hovey and cut-off hits that seemed certain of getting by. The Tigers contributed no less than twenty assists during the game.

Victoria got off in front as usual, scoring a run in the first. Errors helped Tacoma to score in the third and fourth and another miscue in the sixth helped the Tigers to their fourth tally. The Capitals tried a rally in the seventh but it died after one runner had crossed the plate.

CLEVELAND BACK IN LEAD IN AMERICAN

Indians Have Lead of Four Points on New York; Six Homeruns Yesterday

New York, Aug. 20.—The Yankees lost the league leadership yesterday when the White Sox beat them. Cleveland is leading the league by four points.

Of six home runs in the major leagues yesterday, Robertson, Pittsburgh, made two in the first game of the double-header with Philadelphia. Powell's homer with one on base, was a material factor in the Boston National League victory over Chicago.

The other home runs were made by Shanks, Washington; J. Smith, Philadelphia Nationals and Donahue, Cincinnati.

Rogers Hornsby, St. Louis leading National League better, increased his average yesterday by making four hits in five times at bat in his team's victory over Brooklyn.

DEACON McILVRIDE, OF YARROWS, LEADS AMATEURS BOTH AT BAT AND IN FIELD; OFFICIAL AVERAGES OUT

"Deacon" McIlvrde, the handy man of Yarrows, is the real batting and fielding hero of the Victoria Amateur Baseball League, according to the official averages issued yesterday by J. H. Stevens, league statistician. During the season which has just closed McIlvrde played in every game. He finished up with a perfect fielding average, accepting 69 chances without a slip. This constitutes a fielding record never approached at any time by an amateur player. McIlvrde has played every position on the field. He has caught most of Yarrows' games. He figured in the box on several occasions and also made a dependable outfielder.

In hitting two other amateurs are above McIlvrde in the standing but they did not figure in as many games. Green, of the Conservatives, played in eight games for an average of .469 and Lalonde, of the Knights, slugged for 492 in seven games, McIlvrde in 12 games punched the ball for an average of .422. McIlvrde also leads in number of hits, polling out nineteen during the season for a total of twenty-nine bases, which tops the list for total bases.

McIlvrde, of the Conservatives, leads in stolen bases with five, while Gandy, of Yarrows, leads in sacrifice hits with six to his credit. Gandy also heads the list of strike-out victims, having breezed ten times. "Smiler" Petticrew, of Yarrows, is away out in front in getting free transportation to first base, having been passed no less than twenty-one times. Besides this he has been hit five times giving him a total of twenty-six free trips. Petticrew also heads the boot column with ten errors chalked up against him out of seventy-three chances.

In team batting which includes all players who have been registered since the opening of the season, the Yarrows champions head the list with an average of .267 with the other teams following in the same order in which they finished the season, making it appear as though batting was the chief factor in deciding the standing. Yarrows are also on top in fielding closing with an average of .918, with the Elks close behind with .902. Conservatives .881 and Knights .878. The Knights were badly handicapped with the poor showing of the original team and would have probably finished further up had they started out with the present aggregation.

In the slugging department, McIlvrde and Gravin lead in doubles with five each, Johnny Cummins leads in triples with two, while "Haley" Jackson, of the Elks, heads the circuit clouters with three home runs to his credit. The fielding and batting averages are as follows:

MAXIMUM PENALTY

Prosecution to Ask for Jail Sentence for Violation of Film Laws

Chicago, Aug. 20.—The maximum penalty of a year in prison and \$1,000 fine will be asked for "Tex" Rickard, boxing promoter, when he appears before Judge Landis to plead to a charge of violating the federal law prohibiting the interstate shipment of prize fight films, federal officials said yesterday. The evidence will be presented to the grand jury on Monday.

"An indictment will be asked for Mr. Rickard," said John V. Clinnin, acting United States district attorney. "The court also will be informed that this is his second violation of this law which aggravates the offense."

Rickard left last night for New York after declaring that he believed that the law would not stand, and that he would fight the case to a finish.

NEW SWIMMING CHAMP COMES TO THE FORE

Indianapolis, Ind., Aug. 20.—John Wenzelmueller, of Chicago, yesterday took the 220-yard senior free style A. A. U. swim held here in connection with the Indiana championships. The time was 2:28. Ludy Langer, of Honolulu, was second, and Norman Ross, Chicago, was third.

TORONTO SPORTSMEN DEAD

NEWS IN BRIEF

Successful for Naval College.—Rupert Wright, of Cranleigh House School, and Jack Curtis, of the Collegiate, are among the successful candidates in the recent examination for entrance to the Naval College.

Resurrection Lecture.—"The Mystery of Death" will be the subject of a lecture to be delivered Sunday, 8 p.m., 324 Pemberton Building. It will be an interesting evening as the speaker will explain how a person may see his own "vital body."

Motors Collide.—Motor cars driven by E. M. Blanding, Portland, Ore., and M. Phipps, of Blackwood Street, collided at the corner of Cook Street and Dallas Road yesterday afternoon about 5:30, when considerable damage was done and Mr. Blanding's two children were badly shaken up.

Made Presentation.—On behalf of the Life Underwriters of Canada, Kenneth Ferguson, during the closing exercises of the convention yesterday, presented retiring president O. B. Shortly with a handsome bronze office desk set as a small token of the appreciation felt by the association.

Held Unknown Speed Run.—The Victoria Motorcycle Club will hold an "unknown speed" run, starting from the City Hall and ending at the Brentwood cross road this afternoon. The contestant who maintains a speed nearest twenty miles an hour will win the prize, a gallon of oil, donated by Dick Shanks, the local Harley-Davidson distributor.

Will Tour Island.—Preliminary arrangements were made yesterday by the Manufacturers' Committee of the Chamber of Commerce for the tour to up-Island points of Victoria and mainland manufacturers. The tour will be held early next month and H. J. Pendray and R. W. Mayhew of Victoria have already decided to go.

Kumtuka Club.—The Kumtuka Club will meet on Monday at noon for its fortnightly luncheon at the Arcade Cafe, Arcade Building. Mrs. Ogilvie will be the speaker. It is hoped that all members will attend. Those unable to do so are earnestly requested to notify Miss Jessie Brown, 4640, or Miss Taylor, 2228, as early as possible, in order to facilitate the luncheon arrangements.

Await Specifications.—Most of the time of the Jubilee Hospital Board is taken up these days with consideration of plans for the new hospital building. The board at its meeting last night expressed the hope that the specifications would be ready in a few days. A vote of thanks to the City Council was passed for the sum of \$16,500 received and similar action taken in connection with the interest which the Kiwanis Club is taking in the new hospital building.

University of British Columbia.—Owing to lack of accommodation it may be found necessary to limit the attendance of first-year students to those with full matriculation standing. First-year students with defective standing (supplementals) may, however, submit their applications for admission, and these applications will be dealt with later. Principals of High Schools are requested to notify applicants for admission to the University.

Dance at Marigold Hall.—A crowd numbering about 150 entered with zest into the jolly dance at the new Marigold Hall last evening, and the success of this social function in the new hall gave much satisfaction to the promoters, the Garden City Women's Institute. The Harmony Orchestra furnished the music. Cards were arranged for those who did not care to dance, and a buffet supper was served under the capable direction of Mrs. Chambers.

Y. M. C. A. Camp Entertained.—The Y. M. C. A. campers at the George gave an enjoyable and rollicking entertainment last night for the many visitors, over a hundred guests enjoying the attractive programme. The events included musical races and a peanut hunt which caused much amusement, a sing-song with music accompaniment and the serving of delicious refreshments. Among those present was Scoutmaster George Watchman, late of Toronto, who has been a member of the Boy Scouts for thirteen years and was recently recommended for the Scout life-saving medal.

ROCK FALL DELAYS TRAINS

On Esquimalt & Nanaimo Railway Yesterday

Yesterday afternoon's train to Victoria on the Esquimalt & Nanaimo Railway was delayed three hours, due to a slight accident which happened to the southbound freight train.

A small rock which was dislodged from the hillside rolled down to the track, derailing the refrigerator car and the caboose about a mile and a half north of Goldstream.

The accident which occurred at 3 o'clock was quickly rectified when a gang was dispatched to the scene under the direction of the track inspector who replaced the cars on the track little or no damage was done, except for the holding up of the north and southbound passenger trains.

WARD FIVE LIBERALS

Endorse Progressive Club; William Ivel Talks on Political Situation

Further endorsement of the Progressive Liberal Club was given by Ward Five Liberals at a meeting held in the Arcade Building last night, at which A. W. Staples, president of Ward Five Association presided. A good deal of general business connected with Ward Five affairs was transacted and endorsement was given the action of the president and secretary in joining the Progressive Liberal Club. This action means that all wards in the city have endorsed the club.

William Ivel, president of the Victoria Liberal Association, was present and gave a brief address on the political situation of the day.

Announcements

Dr. W. S. Newitt, Dentist, is occupying the offices of late Dr. Proctor, corner Government and Yates. Phone 993.

Dance—Alexandra ballroom, Saturday, August 20. Ozard's orchestra.

BUTCHERS BRAVED RAIN AT PICNIC

List of Awards in Gathering at Saanichton

That the butchers' picnic was a complete success Wednesday, despite the rain was the opinion of the three hundred who attended.

Promptly at the starting hour the long procession began the journey out, first parading through the main streets, led by A. E. Hall, Sr., and Geiger's band.

Five tally-hos and a host of private cars were required to convey the happy throng.

Upon reaching Saanichton it was decided that as the rain still continued to pour in torrents that it was useless to proceed to the original location, Deep Bay. So the committee secured the Saanichton Hall, and the crowd enjoyed themselves more than they could have done had they proceeded.

Shortly after getting all into the big building the band and the glass like floor were sufficient inducements to attract many to dance, and dancing was enjoyed at intervals throughout the day.

Before lunch the children's races were run off indoors, the kiddies enjoying the novelty of running races under cover.

Several of the more humorous events were then brought on. Several of the ladies showed that they were born carpenters by the way that they drove nails. The honey-moon race was also greatly enjoyed by the spectators. There were many entries in the egg and spoon races, ladies showing how adept they were in dropping the eggs.

Weather Cleared.

After luncheon had been served in the big dining room, and some more dancing, the weather cleared sufficiently to permit the rest of the sports evening being run off outside. There was much competition and some fast events were run. Great interest was shown in the masters' butchers' race, which was won by A. Young.

The butcher employees' race was also fast, as was the employees' wives' race. Another fast event was the single ladies' race, which was perhaps the fastest of the day, Miss Grimmond and Miss Elliot having to run a second time to decide who was first. In the second heat both again came in by a margin of a few inches, the judges awarding the prize to Miss Grimmond.

During the afternoon the arrival of a large quantity of ice cream was the signal for a rush by the kiddies, who soon demolished it. After supper dancing was again resumed, and the merry party returned to town about 8 o'clock.

Much credit for the affair is due to Robert Elliott, chairman; Geo. Etheridge, secretary, and the committees who worked very hard. Credit is particularly due to Arthur Stokes, who handled the transportation. The other committees were: Sports—A. Young, R. W. Dodds, A. Currel, A. E. Hall, Sr., S. Grimmond, G. Meehan. Finance—J. Pagan, A. E. Hall, Sr., J. G. Gillis. Transportation—A. Stokes, J. Williams, A. Young. Advertising—Cannon, A. E. Hall, Jr., G. Meehan. Refreshment—J. Warr and J. Green-slades.

The officials for the sports were: Starter, R. Elliot; clerk of the course, A. Young; judges, R. W. Dodds, A. E.

"Now I Wish That I Had Bought a Sonora"

Sonora

Quite often that remark is made when the Sonora is playing.

The superiority of the Sonora is so obvious—so unmistakable. It plays with none of that irritating scratching noise caused by the reproducing point on the record. Best of all, it plays ALL makes of records without the use of additional attachments.

Sonora prices are reasonable, and we can arrange terms to suit your convenience.

THE AUTOMOBILE

EDMONTON MOTOR ENTHUSIASTS SEEK ROUTE TO COAST

Railway Grade Could Be Utilized for Part of Route

Edmonton, Aug. 20.—Strong advocacy for the construction of a highway from Edmonton to Vancouver, via the Yellowhead Pass, is contained in a petition forwarded to the Provincial Government by the Edmonton Automobile and Good Roads Association. This action is along the lines of a resolution recently passed by the executive.

Two hundred and ten miles of railway grade have already been built up this route by the government at an expense of many thousands of dollars. It should not be allowed to deteriorate and become a complete loss, the association has pointed out, when it can be used to such good advantage as suggested.

The auto club has given considerable consideration to the matter, and has conducted an extensive investigation. The conclusion has been reached that a highway from Edmonton to Vancouver would be a tremendous asset to the province, and by furnishing work in its construction to returned soldiers and other citizens, would go far toward solving the unemployment situation.

Of the 800 miles of road to be constructed, some 280 miles are within Alberta, and of this, 210 miles is open railway grade, which could with little expense be put into condition for travel. The British Columbia Government, the association finds, is willing to commence work on the portion of the highway within that province, if the Alberta authorities will take similar action.

Alberta's share of the \$20,000,000 grant made by the Dominion Government for road construction in the various provinces amounts to \$1,477,810, which sum, coupled with that available from auto license fees, should be sufficient to cover the expenditure necessary on the Edmonton-Vancouver highway, the association thinks.

The association asks that Alberta and British Columbia co-operate in the reconstruction of the idle railway grade west of Edmonton to the coast so as to transform it into an automobile highway that will be of great benefit to the two provinces and at the same time create work for those who are unable to find employment.

The members of the Edmonton Automobile and Good Roads Association feel that the government can-

not afford to allow the two hundred and ten miles of railway grade now in existence in this province, and built at a cost of many thousands of dollars, to deteriorate and become an absolute loss, when it can be used to such an advantage. The investigation given to the matter resulted in the following facts being placed in the petition:

The route passing through Jasper Park is the most feasible and least expensive route through the mountains.

There already exists two hundred and ten miles of open railway grade covering this route, which could be put in condition for a highway at a small expense.

The estimated cost in 1918 of connecting up the two hundred and ten miles would be \$24,500.

The whole eight hundred (800) miles of highway would only require the building of thirty-six miles of entirely new road, and that all in the Province of British Columbia.

Of the whole eight hundred miles to be constructed, approximately two hundred and eighty miles lie within the Province of Alberta, of which approximately two hundred and ten (210) miles will be open railway grade.

Your petitioner has been assured that the British Columbia Government can be induced to commence work on the portion of the road lying within their jurisdiction if the Province of Alberta will commence work on the portion lying within the jurisdiction of the Province of Alberta.

The whole seventy (70) to eighty (80) miles not constituting the railway grade to be built in the Province of Alberta is at present entirely constructed, as the road from Edmonton to Wabamun Lake and from the point to Entwistle can be put in good shape and used.

In 1910 a grant of twenty million dollars (\$20,000,000) was made by the Dominion Government for the purpose of road construction in the various provinces, of which Alberta's share is \$1,477,810.

That so far as your petitioner can learn, no part of this money has been used in the Province of Alberta, although almost all, if not all, of the other provinces have availed themselves of it.

Taking into consideration this grant it appears that the highway can be completed to Vancouver at a cost to the Provincial Government of approximately thirty-six thousand dollars (\$36,000), which appears to be directly available from motor license fees.

That the commencement of the construction of such a highway at the present time would relieve to a large extent, the unemployment situation, or solve it entirely as far as Alberta is concerned.

That such a highway would develop Jasper Park as a national playground and an attraction to foreign tourists, especially from the United States, and would result in publicity for the agricultural possibilities of Western Canada and would mean many thousands of dollars in revenue to Alberta and British Columbia.

A Memorial to Honor Anglo-Saxon Friendship

THE INTERNATIONAL PEACE PORTAL

A massive gateway of concrete erected on the International boundary near White Rock, B. C. and Blaine, Wash., U. S. A., where the line touches the Pacific Ocean. Through this Peace Portal will run the new Pacific Highway, from Vancouver, B. C., to San Diego, Calif., U. S. A. This memorial to peace, the first ever to be erected in the world, will commemorate the passing of a hundred years of peace between Great Britain and the United States, without fortifications or armies along 3,000 miles of border between Canada and the United States. This symbol of the ideal of concord and amity between two great democracies has been erected through the efforts of Hon. Samuel Hill, President of the Pacific Highway Association, Seattle, Washington, and will be dedicated with appropriate ceremonies on September 6, 1921. Across the plain on the U. S. front of the arch is inscribed "Children of a Common Mother," and on the Canadian front "Brethren Dwelling Together in Unity." The doors will have these inscriptions: "Open for One Hundred Years," referring to the Treaty of Ghent, and "May These Doors Never Be Closed."

FAVORS AUTOMOBILE CAMPS FOR TOURISTS

Kansas Writer Deals With Widespread Sentiment

Under the sub-title of "No City Can Afford to Sacrifice Its Reputation and Hospitality by Neglecting the Stranger Within Its Gates," W. E. Koehring, a farmer of Lawrence, Kansas, in the following article in "Kansas Municipalities" urges the setting aside of certain open spaces as auto camps for tourists.

Without question the first and original tourist travelled afoot. It is also equally certain that he camped out. He did both from necessity. He may have liked walking but the liking for it did not persist in his successors to the extent of causing them to reject other modes of travel when offered. But that camping out satisfied a real longing of his nature seems clear from the persistence with which one type of successor, the auto tourist, clings to that practice. It is this camping out idea that makes the auto tourist something of a problem to the community through which he passes. The filling station, the service station, and the auto accessories shop amply provide for all his needs in motive power, lubrication, inflation and all other possible and impossible needs and facilitate in every way his journey, as well as

the spending of his money. And the sign, "Oxy-acetylene welding done here," appears in the most unexpected, surprisingly remote, and, with present conditions of roads, welcome places.

Gregarious at Night

If you are out yourself day after day, you will meet the tourist varying greatly in the completeness of his equipment, reflecting in the neatness of his appearance the condition of the roads and the state of the weather and also, strikingly, his love of order or slovenliness. Blithely individualistic through the day, sufficient unto himself, the average traveler will find himself, as the day draws to a close, seeking some common point at which to gather and spend the night with others. This natural social instinct is fostered by a variety of causes. A certain timidity and dread about camping alone in the open in a strange community is felt by many. Another factor is the desire to discuss the condition of the road and routes of travel with those who have just been over them, and to learn of the best camping places on ahead. The fact that it is more satisfactory to buy food supplies in small quantities as needed rather than carry large supplies, and the further fact that an abundant supply of water of desirable quality can usually be found in town or city and not always elsewhere, determine the point of gathering.

Most towns and cities that are so situated as to have any considerable number of auto tourists passing through are recognizing a very obvious situation and are making an effort to meet it by providing some sort of place for them to camp. In

some places this has been done in a spirit of true hospitality, with a studied attempt to provide for the needs and comfort of these travelers. With other places the response has been very reluctant, with no thought even for the absolute need of the situation. The question for each community is whether it can afford to allow this ever-increasing host to pile up on the next town. From a business point of view, it is well to consider along the way by the tourists is very great. Also, the purely humanitarian aspect of the situation cannot well be disregarded. There is also an ethical side, for there are some from every community accepting this sort of hospitality elsewhere and as a community we should do unto others as we would have them do unto us.

Equipping the Camp

But, aside from all else, it must be recognized that there are certain things that the tourist must have: sanitation and public health. The community cannot afford to neglect. Adequate toilet facilities that insure privacy and decency are of course the first requisite and every effort should be made that cleanliness prevails. The most satisfactory arrangement that we found in visiting many tourist camps last summer was buildings constructed entirely of concrete, built so that they could be thoroughly flushed and scrubbed. Sewer connection is of course highly desirable.

The water supply is next in importance. In the larger camps that we visited this was supplied by conveniently placed hydrants but, in most cases no provision was made to take care of the wastage in drawing water and thus the surroundings were made very sloppy and disagreeable. Brilliant illumination is not desirable but wherever it is possible some lighting of the camp is a good thing because of the feeling of safety that it gives the tourist and the better chance of observation it affords the community. Rough tables and benches were provided in some of the camps, and ovens of masonry had been built for cooking purposes. In some cases firewood was furnished free. This may have been partly a matter of self protection, for loose lumber and anything that burns readily is liable to be gathered up pretty closely when the need of fire for cooking or warmth becomes urgent. Shower baths were provided in some places and we noticed that

these were much patronized by the children. One of the things found occasionally and much appreciated was a place to wash the car. Sometimes this was simply a hydrant with sufficient hose to reach around the car, but at Ogden, Utah, where, in addition, a concrete slab had been laid on which to work, the arrangement seemed complete. In Blackfoot, Idaho, the park was divided, one half being used for camping while the other was being irrigated. This arrangement insured the life of the trees and grass without discomfort to the campers.

A well drained location is best for any camp ground and trees will contribute much to the comfort of the campers. Some regular caretaking is necessary to keep the place in a habitable condition. The tourist should be encouraged to be tidy about his surroundings, and this is best accomplished by providing receptacles for refuse and requesting their use by conspicuous signs, and by daily cleaning of the grounds allowing no accumulation of waste.

Conspicuous signs giving clear directions as to how to find the auto park at the points where the principal roads enter the town are of great assistance to the tourist. In some cases the interest in this subject by some public official manifested itself by his daily visits to the park and his mingling with the tourists to learn of their ways, and to get new ideas as to their needs. This interest does not need to be confined to an official, but any public spirited citizen might well take it upon himself to study the needs of his city's auto park. Needless to say, it was in places that such interest was manifest that we found the most attractive camp surroundings, and it would be fortunate for the tourist and the town, too, if there were more public officials and citizens who would take a personal interest in this subject.

FORD PRODUCTION.

Detroit, Aug. 20.—The Ford Motor Company is making a car every six and one-half seconds. Production figures given out this week show that under the July schedule production, based on the eight hour day, is averaging 4,306 cars a day. It is expected July will show a total production of 102,000 cars.

During June 108,962 cars were turned out and during the second quarter of the year, April, May and June, the production was 301,796 cars. Production during the second quarter of 1920 was only 220,878 cars. Record production for one day was established June 23, when between sunrise and sunset, 4,454 cars were made.

LEAK IN EXHAUST.

If the exhaust system emits an unusual noise when the cutoff is closed it indicates a leaking or disconnected joint somewhere in the exhaust pipe or muffler or at the point where the exhaust manifold connects to the engine.

UNIT POWER PLANT.

The engine, transmission and clutch assembled in the same case form the unit power plant commonly used in modern cars. It is used to a great extent because the depreciation is lessened and efficiency is increased by this method of assembling, due to the fact that all members of the unit are held in perfect alignment during the entire life of the car. Strains or stresses will not throw them out of line under any driving conditions.

RUBBER CEMENT.

When rubber cement has stood exposed to the air, even for a short time, it becomes so thick that it does not give good results in application. Many motorists thin cement with gasoline, but the ordinary grades of gasoline contain considerable oil, which has a decidedly adverse action on the cement. High test gasoline or kerosene of carbon is best to use for thinning.

NOVEL USE FOR TRACTORS.

The field for the farm tractor is widening. Nowadays one finds them operating successfully on such jobs as operating a sprayer, constructing levees, dragging logs, hauling road material, cutting ensilage, shearing corn, mowing golf links and a motor cultivator even has been employed in the North to remove snow.

USE INTER-LINERS.

After a casing has been long in use, sometimes stretching develops, so that it takes longer to inflate it. A stretched tire should not be pumped up too tight and incidentally it is best to fit such casings with inner liners. By this means a good many more miles can be gotten out of them.

GRABBING CLUTCH EXPLAINED.

Clutch leather which is worn or exceedingly low, or in case of a clutch which revolves in oil, a lack of oil or the wrong grade of oil will cause sudden grabbing of the clutch, causing a car to jump forward suddenly when it is first started.

PASSING OF THE HORSE.

The passing of the horse again is demonstrated by the action of the Sandusky County (Ohio) Horse Owners' Mutual Protective Association, which has been rechartered as the Sandusky County Automobile Mutual Protective Association.

WORN NEEDLE CAUSES CHOKE.

Choking of an engine while being quickly accelerated, if it runs well after high speed is attained may be caused by a worn needle valve in the carburetor, which may need a mixture too rich for slow but which will be correct on higher speeds.

Good Lubrication—Not Expensive

Quality maintains economy. No matter how much you pay "per gallon" for other lubricating oils, you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

YOU buy lubrication at less cost per mile when you use, exclusively, the correct grade of Imperial Polarine Motor Oils.

Imperial Polarine Motor Oils last longer. Due to their superior quality, they stand up well under any kind of usage. The cost of 100% lubrication by the mile or by the year is surprisingly small if you standardize on Imperial Polarine Oil.

Imperial Polarine Motor Oils eliminate carbon troubles and reduce friction drag to the lowest possible point. They insure you all the pleasure and satisfaction of an efficient, cool, smooth-running motor, with the greatest possible economy in operating costs.

There is a grade of Imperial Polarine Motor Oils exactly suited to your car. Consult our Chart of Recommendations at your dealers; or write to 56 Church Street, Toronto, for our interesting booklet, "Automotive Lubrication." It contains the complete Chart and other helpful information.

IMPERIAL OIL LIMITED

Branches in all Cities

FOR A CLEAN EFFICIENT MOTOR

Dealers displaying this sign are equipped and ready to give every crank-case cleaning job prompt and expert attention. Such dealers use Imperial Flushing Oil, a special cleansing agent. Kerosene (coal oil) will not do. Get more satisfaction and materially reduce operating expenses by having your crank-case cleaned frequently. To-day: Employ Imperial Polarine Crank-Case Service.

THE AUTOMOBILE

YMR ROAD PROJECT TO BE URGED AGAIN

Port Alberni Convention to Hear of Needs of District

For the third year in succession the merits of the Ymir road project will be presented by the Nelson and District Automobile Association to the convention of the Good Roads League, which will be held this year at Port Alberni on August 30. At the last session of the club the old resolution, whose terms are quite familiar to the Provincial Government, was adopted again for submission to the convention as follows:

"Whereas, there lies south of Nelson a district rich in timber and minerals; and

"Whereas, this district is traversed by a highway from the international line north and within some 20 miles of Nelson; and

"Whereas, the above industries look to Nelson as a wholesale centre of supplies; and

"Whereas, the connecting up of Nelson to the south would result in heavy tourist traffic from the United States to the Kootenay lakes and rivers; and

"Whereas, the mining industry is largely backed by Washington men who would use it for business purposes;

"Resolved, that the convention urge upon the Government the necessity of building the link above referred to; and further be it

"Resolved, that the Provincial Government be requested to state how far negotiations have proceeded with the Dominion Government as to the Dominion Government's grant of 10 per cent. toward the construction of the important link in the highway system of British Columbia."

The Ymir road also has the backing of the City Council, which has already sent its resolution in, to go at the head of the league's demands, a position it also occupied last year.

Keep springs tight at the axles. That is where most spring breaks occur.

TRUCK TALKS

NO. 2.

By A. E. Gemmer,
Chief Engineer of the
Day-Elder Motors
Corporation.

Low Grade Gasoline.

It is difficult to vaporize completely the ordinary commercial gasoline. In cold weather it is sometimes almost impossible to start an engine without first warming up the cylinder jackets or intake manifold. The carburetor is supplied with an air choke which

enables the driver, when starting the engine, to close the air inlet passage. This permits a rich mixture of gasoline to enter the cylinders and makes starting less difficult. Using the air choke too frequently has a tendency to deposit large quantities of gasoline in the crankcase.

If, during cold weather and when the engine is running erratically, having a tendency to miss, and is slow to warm up, lacking power, and showing symptoms generally of unsatisfactory operation, the driver will draw off all the oil in the base, he will find, instead of pure cylinder oil, a solution adulterated with a large percentage of gasoline.

There have been tests made recently that prove conclusively that engines operated to-day with the present quality of gasoline have to be more carefully looked after than ever

before in the history of the automobile.

Test No. 1.

An engine in which the cylinders and pistons had worn to such an extent that the engine had lost a large percentage of its efficiency was taken down and the cylinders ground accurately to 20-1000 inch oversize. New pistons and piston rings were fitted accurately to the newly ground cylinders. The engine was re-assembled and filled with new, clean oil. The engine was run continuously for sixty hours and then taken down and the pistons measured for wear—and there was no measurable difference in their size after this test. The oil was then drained from the engine and the crankcase filled with oil taken from another engine which had been run as the average careless individual runs his truck. The oil had been in the other engine for weeks, the supply had been added to from time to time, and the crankcase had not been drained for a long time. This newly fitted up engine was then run continuously for sixty hours with this oil, and then taken down and the pistons measured. They had worn 5-1000 inch, and the cylinders had also worn about the same amount.

This proves conclusively that the oil in an engine should be changed quite often. Experience has proven that the crankcase should be drained at least every five hundred miles and new oil put into the engine.

Test No. 2 gives the reason for the foregoing. An engine was filled with fresh, clean oil and run idle for quite a long period of time. The oil originally put into the engine was accurately measured. After the test the oil was drained from the engine and again accurately measured, and by liquid measure there was seven ounces of additional fluid in the crank case over what had originally been put into it.

What Is The Answer?

We know by experience that the normal consumption of oil in the engines in Day-Elder trucks is unusually low. This feature in any truck is a praiseworthy one. At the same time we often wonder why so many drivers to-day claim that they can run their truck a certain length of time, or a certain distance, with only a pint or two of oil. One should be suspicious if an engine is not using what would be considered a normal quantity of oil. The reason is simply this: The low grade gasoline of to-day condenses very easily in the cylinders, especially if the en-

gine is "idling," or the carburetor is set too rich.

Practically pure kerosene works down by the pistons into the crankcase and mixes with the lubricating oil—with the result that the lubricating oil is thinned down and does not have sufficient lubricating qualities. Therefore, the pistons and cylinders must wear unnecessarily. There is only one way to overcome this trouble, and that is to change your lubricating oil at least every five hundred miles, and set your carburetor on the most economical mixture it will run on. Then do not let the engine run idle unnecessarily while the truck is standing.

Providing the engine has not been damaged by continued operation without proper lubrication, it should, upon being re-filled with fresh oil, show all of its former speed and power. However, if the engine has been operated for some time under the above conditions, it undoubtedly will be damaged permanently.

Next Saturday I shall enumerate the troubles caused by loss of lubricating qualities in the engine, and how best to eliminate them.

GAS PRICE REDUCED

General Reduction in Wholesale and Retail Charges.

Following the announcement by the head offices of the Imperial Oil Company a few days ago to the effect that gasoline would be reduced in price two cents per gallon, the local representatives immediately put the reduction into effect.

Automatically the retailers reduced their price in the same proportion and the result is that gasoline for general use is now selling to the consumer at all garages at 37 cents per gallon in Victoria.

Automobile owners will be glad to hear of this reduction, which will make a considerable difference in the expense bill of those who use large quantities of the necessary commodity.

TIRE USERS WARNED

No better rule has been devised for tire economy than to avoid the use of inside protectors in new tires, say Miller tire men. Even the most flexible quickly destroy a tire. Only to reinforce old tires otherwise serviceable are they an advantage.

Road-Making Scenes Along Island Highway

The above shows the road gang at work on the extension of the hardsurfacing of the Island Highway, which, when complete, will give motorists a splendid highway from Victoria to Langford Station. The length of the new concrete section between Colwood and Langford will be about 2½ miles.

Photos by F. G. Goodenough.

The above shows another scene on the Island Highway hard-surface extension to Langford Station. The view shows the road gang engaged in laying the concrete. The Public Works Department decided to use concrete owing to its permanency, and resultant reduction in the cost of maintenance.

WHERE MOTORING BECOMES A CRIME

Shanghai Proposes Some Mild Methods to Make Motorists Think

Motorists in China are not likely to have such a comfortable time of it if the recommendations of the Chinese Society for the Protection of Life in Shanghai are adopted by the Municipal Council. The report just to hand declares that many deaths are caused by autos in Shanghai and the society has been formed with a "view to putting an end to this nuisance." It is suggested that a bell be attached to the front wheel of every motor car in order that pedestrians and others may be warned and prepared against approaching cars. Every motor driver should be compelled to wear a white brass plate, size three inches, on which is engraved his name, in Chinese and English and his license number. On all motor vehicles, regardless of whether they be cargo wagons or ordinary cars there must be another person beside the driver, who shall sit at the back of the vehicle and warn people when the car is turning corners or about to back.

Should there be any loss of life or injury to persons, wax models of deceased or injured, showing the place

where the person was struck shall be made and placed in a small room, in which the driver of the motor car at fault shall be locked, so that he will be careful in future. This method has been found very successful in America.

Further suggestions from the Pak-hoi Road Street Union are that all motor car drivers shall, after passing an examination, serve for three months with the police department on probation, and if qualified shall be issued a license and then must serve one more month with the police without pay. Besides having their photograph and full details on their license it is suggested also that in case any person is killed the driver of the car at fault shall be held wholly responsible and be sent to prison for a minimum of two years, followed by expulsion from the country.

Drivers found guilty of causing the death of a human being shall never again at a future date be allowed to fill positions as motor car drivers—even under assumed names. Besides punishing drivers, owners of cars shall be fined and it is suggested that the court impose penalties requiring them to pay monthly instalments to the families of the deceased person so that they will exercise greater care and discretion when selecting their drivers in future.

For the sake of the motorists of Shanghai, it is hoped that these recommendations will not be adopted in their entirety.

An electric light that is switched on to illuminate an automobile step as the door is opened has been patented by an English inventor.

HEAVIEST MOTOR TRAVEL OF THE SEASON REPORTED

Coast Vessels Kept Busy Handling Large Influx of Tourists

This week has been the heaviest experienced this season by the B. C. Coast Steamship Company in connection with the handling of automobiles, and the local docks on the Inner Harbor have presented busy scenes upon the arrival and departure of the various vessels plying to and from Victoria.

Thirty-eight, forty and forty-one cars have been handled on an average throughout the week and this does not include the motor cars handled by the steamer Sol Duc of the Canadian Puget Sound Navigation Company operating between Victoria and American ports.

It has been said that a good many tourists are averse to bringing their cars to Vancouver Island on account of the inconvenience experienced in putting their cars on the ships but if the manner in which the local steamship officials have handled the business is any criterion, there should be no hesitancy on this score, whatever. Every courtesy is extended the motorist, and he is sent on his way rejoicing.

The present is about the peak of the season for automobile touring and at this time of year the visitors find the air of Vancouver Island extremely bracing. The early morning is the best part of the day for motoring through the woods and down by the seashore, where the friendly waters prove very inviting for a morning dip.

California and Oregon cars are very much in evidence this season and Washington has the usual large number of license plates in evidence.

"GUTTA PERCHA" Tires

Cord
and Fabric

Wherever motorists meet, in clubs on city streets or in distant hamlets, the praises of "Gutta Percha" Tires are heard. The universal comment is that "Gutta Percha Tires stand up." "Gutta Percha" Tires, from inside to outside, stand the racket of hard driving and have been declared by experienced motorists to be the most satisfactory of all tires.

"Gutta Percha" Tires are priced as low as good tires can be sold for, and, when you buy one, you may feel assured you are buying comfort and a feeling of security as well as full value for your money.

With our Young Folks at work and Play

How Fortune Won Fame For Billy The Village Goop

Did you ever hear the story of Billy the Goop? Billy was an awkward lad of some thirteen years of age. He was held to be the fool of the family, and of the community in which he lived. In any group of boys that were playing, Billy was made the butt of every joke and practical prank, and was generally "good for it."

It was Billy the Goop, that they placed in the way of the village constable when he was looking for a case. It was Billy they blamed when anybody missed anything whatsoever, and rather than deny these charges Billy had become reconciled to being at fault in everything, for no matter how innocent he might be, he was treated as if it was he and he always who was responsible for all wrong and all damage caused.

Billy lived in a little valley that nestled under southern skies, with the nearest communication with the outside world being a railroad flag station some ten miles across the open plains on the other side of the hills. A wagon road to the flag station was the only road into the village, and it can easily be imagined that little excitement ever came the way of Billy and his scoffers.

It was in this setting that events occurred that were to change the life of Billy the Goop. With the reputation of a bad boy and a fool, Billy had accepted that rating for himself and in consequence he really thought it was no use trying to be anything else. It was through Nancy, a pretty little girl of Billy's age, that Billy was brought to a realization of what he could do in this world.

Nancy Bonnie lived in a comfortable bungalow on the crest of the hillside, about half a mile up from the floor of the valley, with her mother and an elder sister. The family were living in modest but comfortable surroundings, though they had never quite recovered from the tragic death of Mr. Bonnie who had been killed by lightning on the top of the hills one Summer.

It was on a Saturday afternoon that the great excitement happened. Playing in a group at the schoolhouse Billy the Goop noticed an unusual volume of smoke arising from the Bonnie home. He called to his playmates and they rushed in a group to the scene. Half way up the hill they were met by Mrs. Bonnie, who was running to the fire marshal's house as fast as she could.

The village fire brigade was a volunteer organization with the captain sixty years of age, and the latest recruit a young man of fifty. In terrific haste they put drag chains on the ladder rig and pulled it up to the Bonnie house, which was now blazing furiously. Others gathered and formed a bucket brigade, but with only a small well as the source of the water supply little could be done. Mrs. Bonnie and her eldest daughter were in front aiding in taking away what furniture that could be reached through the ground floor windows, when it was discovered that Nancy could not be found.

The Bonnie home was a long rambling house of wood, and the spectators were presently horrified to see Nancy in the centre of the building, with all hope of escape apparently cut off. The captain and his men tried to win through the fire to the girl, who could now be seen on the floor with her head held low to gain what air that remained. There was a rush and a shout from the throng, as Billy the Goop, with a wet sack around his head was seen to be struggling through the blazing doors, and under the now crumbling roof towards Nancy. In less time than it takes to tell, Billy the Goop had carried her out taking off the sack from his own head and wrapping his coat about her body. Billy staggered out of the fire with his hair burned, his hands and face blackened and his clothes in burning rags about him. He fell with his burden and was dragged to safety by eager hands. Nancy, after a brief time in the open air was discovered to be unhurt, but Billy the Goop was unconscious, and almost unrecognizable. What followed might almost be guessed by our little readers. Billy, no longer the Goop, was nursed back to health by the Bonnies and later made his name stand out in the world. In the course of time the villagers were called together to celebrate the marriage of Nancy Bonnie to Billy, and the villagers tell the story of the rescue of his bride to every stranger that passes that way.

Neighbor Mars Is a Wanderer

In relation to the "street of the skies" the earth on which we live has as its planetary neighbors Venus and Mars. Venus you will have heard much about in other places, but Mars is of peculiar interest to this world for the reason that for a long time a warm controversy was waged among scientists and others as to the possibility of there being life on our neighbor Mars.

If the earth might be thought of as a fairly large house with one custodian at the gates of its grounds, Mars might be described as a detached bungalow with two gate lodges, for it has two little moons, Deimos and Phobos. In size Mars is about half that of the earth on which we live, and that means only about one quarter of its cubic contents. While we do not know all there is to be known about any of the planetary bodies, we are permitted to gain a considerable knowledge of our neighbor Mars from observations possible every two years and a little over.

Mars has marked features that resemble the continents and oceans of this world. What appear to be rivers, lakes, and other features of the earth also being discerned. It has two remarkably clear poles, capped in white, similar to our Arctic and Antarctic regions. These white caps on Mars extend in its Winter period and decrease a great deal during its Summer. There is reason to believe that if the continents of Mars are actually such that for certain periods they are completely inundated with water (if it be water). There is some atmosphere surrounding Mars but not like that of the earth, it is held, clouds are also to be observed at certain times when observation is possible.

It is about the two attendant satellites of Mars that a quaint interest attracts us, for they behave in a most extraordinary way. First, let it be said that to the view point of a watcher on this earth, Mars himself is an extremely erratic planet, and it is only astronomers who can foretell where he is likely to be heading next, as from our viewpoint he twists and turns in a very changeable manner. That there is rhyme and reason in his seemingly erratic movements may be seen, however, in the degree of accuracy with which our scientists may foretell his appearance for years ahead.

Deimos and Phobos, the attendants of Mars, must be great pals, for they spend their lives in playing "tag" about their parent body. Phobos, closer to Mars than his chum makes the circuit around that body in seven hours and 39 minutes, while Deimos, a slower fellow, takes all of thirty hours and eighteen minutes to make a "home run." So it is that we are permitted to see them first at one side and then at another, peeping out from behind their parent in a manner that is quaint and fully suggestive of a game of "tag."

If it were possible to support human life on Mars, a watcher there would see Phobos making his rush across that portion of Mars on which he stood, three times every day, while the slower Deimos would make a trip past his observer but once in the day, and then be behind in his schedule in making the full circuit. Mars, as with both of his attendants, get his light from the sun, and has no light of his own. About the actual composition of Mars we are not permitted to learn very much, and as to whether life is possible there or not, the keenest brains in the scientific world are still in some dispute. Mars, in mythology, stood for the god of war.

ORIGINALITY PAYS

Eddie needed a "job" in the very direct way possible. Eagerly he read of a vacancy in the office of a powerful business man down town. He dressed in his best next morning and was down at eight o'clock, although the advertisement had stated nine o'clock, but found, to his horror, that nearly one hundred were waiting to apply for the position. A long queue had been formed, and Eddie found himself only as far as the out steps of the buildings, as he stood in line.

Presently he rushed away and was back in a minute or so, now, of course, on the very end of the queue. The door opened and his name was called, and in short he was given the position. He, seeing that there was little chance of even being permitted to apply for the post, had repaired to a telegraph office and wired the business man in the following terms: "The man you want is on the end of the line." The business man was so taken with the originality of the idea that he immediately gave the boy a trial, and Eddie made good.

THE BLOWERS IN OPERATION

The Souffleur, the famous blowing rocks of the Mauritius, which were recently described in this page. Here the Souffleur is seen in active operation, forcing the water through its narrow channel to a height of sixty feet into the air. After the spout has subsided the Souffleur will emit a humming sound, caused by the partial vacuum left by the waves, and this sound will be heard for some miles from the scene of this strange rock.

Holiday Contest Closing Shortly

The time is drawing short when the end of this month will see the last of the Summer holidays, and school once more will occupy the attention of our little readers. This Summer has been especially brilliant and what a wonderful series of outings our young folk must have had these fine August days.

For the best short story setting out the experiences met with in the holidays, and the enjoyable outings held The Times is offering two prizes. The Holiday Competition, as it is known, is open to all girls and boys of fifteen years of age and under. The first prize is one of three dollars, and the second two dollars. The ordinary rules of composition will apply. Contestants should be careful to include their name, age, and address. If the stories are enclosed with photographs of the outing described, so much the better. The illustrations will be made use of wherever possible.

The competition will close on September 1, and all entries should be in at that date. Address contributions to The Editor, Times Children's Page, Victoria Daily Times, city. The entries will be judged with due regard to the age of the individual contributor, and our little friends need not be afraid that their elders will have a more favorable showing, as that will not be the case. Be careful, then, to state your age, and to certify that the story is of your own composition, and the actual narrative of holidays you have enjoyed.

Do You Keep A Daily Record?

Do you keep a diary? If you do not, you have to learn the pleasure that may be derived from looking back in the pages of such a record and visioning the happy days of past times spent with companions that now have drifted far apart. A diary is a very useful record to keep, it aids one in recording the many little things about the day's work and play that are well remembered, and bear a lesson worth knowing.

A diary is a record in writing as valuable as a photograph album, and these two together are a key to the past. The value of such a combined record may not appeal to you at once, but by experiment you would find that a diary will help you every day and each day you will have something fresh to record, something that you learned during that day, and something that maybe you will need to use again before long.

The habit of recording your doings daily is a useful one for another reason. It teaches one self-control, to an extent that is rarely realized until the record is commenced. Try keeping a diary if you do not already do so, and you will see what a rare fund of pleasure may be obtained in this manner, that would otherwise be lost.

News and Notes Of Victoria Boy Scouts

The Fairfield Troop of Boy Scouts with the Wolf Cub Pack has just completed a ten-day camp outing, held at Goldstream under Scoutmaster C. Frampton. The Fairfield Troop was joined for part of the holiday by portions of the James Bay Troop and the St. John's Troop of Scouts. P. E. Wilkinson, acting S. M. of the St. Aidan's Troop was in attendance at the camp for the whole period, and the camp was assisted greatly by the presence of officers from the other troops.

The Fairfield Scouts opened the camp on Saturday, July 30, and were in camp until the tenth of this month, when the Wolf Cubs took over, under a few Scouts who remained as leaders for the juniors in camp. In all twenty-nine Scouts and sixteen Cubs were in attendance, and a most enjoyable camp was held.

The troops trekked out to Goldstream on the Island Highway making a short halt for lunch on the way. Sunday was spent in getting the camp into shape and in preparing for the ten days' training. On Monday a long hike was held to visit the Duncan Scouts on board the incoming train. Wednesday was parents' day and a number of parents from the city and district made the journey to the camp to see the Scouts under canvas. An excellent programme of sports was staged in this connection, and the work of the Scouts in camp drew commendatory remarks from the many visitors.

During the remainder of the Scout camp tests were held, alternated with hikes, and field tests. On the tenth day the Cubs arrived and took possession, and were put through a similar camp under a few Scouts as leaders. Hikes to Langford and the surrounding districts were greatly enjoyed by the members in camp. The party returned at the conclusion of the period greatly benefited by the camp in the open. The Langford Scouts and other surrounding troops made several visits to the local boys in camp, and were suitably entertained. The camp of the Fairfield Troop and Pack with the guest troops was greatly enjoyed by all.

MORTALLY TWISTED

Paddy was roused from a deep sleep by his wife, who had fancied she heard sounds from the downstairs floor, and feared burglars. "Patrick, wake up, man; there's burglars below," she said. Paddy crawled out of bed slowly, partially dressed himself and stumbled towards the stairs, still more than half asleep. Presently he tripped and rolled to the very bottom. "Are ye hurt, Pat?" asked his wife, and was astonished to receive the following reply: "Oh, Bridget, I'm mortally twisted." In his haste Paddy had entered his nether garments back to front, and fully thought he had been twisted completely around by his fall.

Weary Ones Are Self-Deceived

Do you know that it is almost impossible to go through life taking an interest in your surroundings and not learn something useful every day? Of course, there are many people who do to-day what they did yesterday, and what they expect to do to-morrow. These go through each day's work and round in the same manner, learning little or nothing from their surroundings, but they are the unfortunates who have never gained the art of aiding themselves.

Stop and think for a moment. Have you ever talked to a fresh acquaintance without learning something you did not know before? It is not likely, but, of course, possible. Everybody and everything with which you meet has a definite message for you, and it is left to yourself to take advantage of that message for your own ends. Some things that you learn in this manner would be better left unlearned; others that you have failed to grasp would have been of great use to you in later life. It is left to you to decide what will be to your interest, and that which is not "worth while."

You may see, perhaps, the best examples of this truth among the "grown-up." Some are obviously "bored to death" with their surroundings, which you will find is only another way of admitting that they are tiresome to themselves, while others again take a keen and ready interest in everything, and these latter are the truly well worth knowing.

It is the girl or boy who takes an interest in everything who grows up to be attractive to others. For it follows given a desire to learn something of all phases of work and life, that the possessor of such a keen interest reads much that he or she wishes to learn, from the writings of others.

Not all that is worth knowing has been discovered in these days in which we live. Most of the interesting facts about this world have been handed down to us in the writings of others who have lived their allotted span and passed along. The ancients chiseled out their messages in stone, chiefly by means of drawings. Later periods produced writings on parchment, or very strong paper. Still later generations wrote books, while to-day, books convey all the knowledge that is known to man, though doubtless much knowledge has been lost for lack of complete and perfect records of the ancients, and their successors in the succeeding generations on this earth.

It would be impossible in many life times to learn all there is to be learned about everything, but with that aim in view the individual girl or boy will soon surpass companions that she, or he, will become marked among all for their learning, and understanding of the ways of life. The tired and bored individual expresses the feeling of being wearied with everything, and indeed, if the truth were told, it is the weary one who wears himself and all with whom he is thrown in contact. See to it that you take a keen interest in all that there is to be learned in these happy days of youth; for in later life the mind becomes less flexible, if not properly used, and knowledge will only be bought at a heavy sacrifice of time and personal hard work. Let it be a motto to your own life, "I am interested in everything," and you will grow up to be a peer among your fellows.

Our Courtesy Is Always Worth While

Not long ago a stranger in London approached a little girl and asked the way to a certain street. The little one not only proffered the information desired but did so in such an engaging manner, that the stranger took a note of her name. It was not long after this that the little girl became an orphan, and one day returning to the home of her aunt, with whom she stayed that a big car drew up behind her and the same stranger got out and came forward to where the little girl waited in wonder. The man inquired the way to such and such a street, and the little girl directed him with the same quiet courtesy. The man returned to the car and drove off. Not long after this the little girl received a letter from a firm of famous solicitors, and in calling in response to the request, was told that the stranger had died and left her his estate and a fortune of \$450,000. In his will the stranger had written that he gladly left all he had to the only one who had shown him the slightest courtesy in the course of a long and successful business career.

Doggie Taken For Go-Cart Outings

It was a sad day for Sheila when Billy broke her best dollie, Annabelle. Annabelle was a flaxen haired creature that moved its arms and legs, and could be dressed up in a hundred different ways. It had a very red complexion, and startling blue eyes, that would close when it was put-to-bye-bye, and open with astonishment when aroused from its dollie sleep. Annabelle, if she could have suddenly come to life, would have undoubtedly made her living as a fashion mannequin, for her dresses were changed nearly three hundred times a day by the assiduous and artistic Sheila.

Early in the morning Annabelle would be taken from her wicker work cot and would be dressed for "house work." Attired in her neat blue print pinnie she would be taken around the morning chores, would watch Sheila helping her mother with the many little household jobs that formed the morning routine in that home.

Annabelle was dear to the Irish heart of Sheila in her afternoon attire, when she would be arrayed in a fashionable walking suit, and hold a delicate pink parasol. Annabelle at this stage of the day would be taken walking, and when tired, as all dollies are in the afternoon, would be put to bye-bye in a smart little go-cart that formed part of her regular equipage.

Annabelle was beloved by Sheila in her wedding gown (which had been made for her by Sheila's aunt who was a lady with vision and also Irish). In this attire Annabelle would be married to all the men dolls in the household in turn, even down to the Golliwog, who truly made an impressive groom for so fair a dollie maiden.

It was not to be wondered at, then, that Sheila wept when the head of her darling Annabelle was cruelly severed from her body by Billy, the young Turk, who was playing at a weird game he called the massacre, (for he had once read of the Armenian massacres where heads were severed from bodies, in the newspaper stories, with great frequency and gruesome details). It was as a chieftain of the Young Turks that Billy ordered the decapitation of the glorious Annabelle.

Bereft thus cruelly of her treasured playmate, Sheila was reduced to a paroxysm of tears, that not even the grimy nickel that Billy placed in her hand by way of hush money—could quell. After some time Sheila recovered from her loss, but still felt the want of a really "personal" dollie, such as the late lamented Annabelle had proved to be.

Billy had a fox terrier puppy by the name of Sport, and this was the peace offering that had to be produced before Sheila would "hush" long enough to allow Billy's escapade to pass unnoticed in the household, for if his daddy had learned of Billy's "Armenian Atrocity" poor Billy would have been deeply interested in another type of atrocity less dear to his heart.

Sport, quickly to be re-named Prince, thus became the legal and sole property of Sheila, and Prince was made to fulfil the real gap left by poor Annabelle, the martyr, even to the fashion parade in varying attire. Prince appeared in the morning in a workmanlike pair of doggie overalls, at noon in a nondescript garb that sustained him in lieu of a house dress. In the afternoon he too was taken walking with the headless remnant of the once fair Annabelle. But the programme was not quite complete, alas maternal authority decreed that Sport, alias Prince might not be taken to bed with Sheila, as he might bark and awaken the household at all hours of the night.

In time the headless Annabelle was discarded, and Prince held the stage alone, in the high regard of the artistic Sheila. Prince would daily be seen "on the row," along with other little occupants of doll carriages, where Sheila would formally introduce him to the dolls of the neighborhood. In time Prince came to look forward to these outings, and would even jump into his go-cart in an effort to induce Sheila to give him his expected airing.

Sheila with the strangely garbed Prince "a la Annabelle," are a familiar and quaint sight on the street in a certain section of this city where the artistic ideas of the Irish colleen are often the cause of kindly humor on the part of passers-by. Strangely to say, Prince would not miss his outing in the Annabelle go-cart for anything, not even the tempting offer of two bones could coax him from his daily airing—"a la Annabelle."

Real Estate—Houses, Acreage, Bungalows, Dairy, Fruit and Chicken Ranches for Sale

OWN YOUR HOME

OPEN SEASON FOR SALMON FISHING ON SOUND EXTENDED

Washington State Board Acts
When B. C. Declines to
Co-operate

Seattle, Aug. 20.—The open season for salmon fishing on Puget Sound is extended up to and including September 5 by Order No. 14, passed yesterday by the Washington State Fisheries Board, effective as on August 20, and which amends Order No. 11.

A ten-day closed season still remains from September 6 to September 15, both dates inclusive, but the State Fisheries Board, in passing Order No. 14 declared it would make any order entirely doing away with any closed season until October 26 unless the Canadian Fisheries officials also provide a similar closed season on the Fraser River.

Notice to this effect has been forwarded to the proper Canadian fishery authorities.

In making this information public today, the Secretary of the State Board, L. S. Darwin, who is also State Supervisor of Fisheries, said that the action was taken by the Board immediately upon its return from an extended cruise over the fishing grounds of Puget Sound and British Columbia, taken by a majority of the members of the Board.

During this cruise, for the second time the Board members interviewed the Canadian Fisheries officials, who have authority to establish closed seasons on the Fraser River, in an effort to have them provide a closed season similar to the one established by the Washington State Fisheries Board, namely, from August 25 to September 15.

Failing to receive such assurance, the Board felt it would simply discriminate against American fishermen if a closed season was put into effect on the Fraser River on August 25, while the British Columbia waters remained open, for all of the fish which would be saved in Puget Sound on the American side would surely be caught by the Canadian fishermen, as all of the sockeye and by far the greater per cent. of the humpbacks which would be saved in Puget Sound would enter the Fraser River in British Columbia for spawning and would be caught there.

The State Fisheries Board hopes that the Canadian authorities will finally agree to establish a ten-day closed season from September 6 to September 15. If, however, they refuse to do this, the Board will further amend its orders so as to do away with this closed season.

PROTESLAUS IS DUE WEEK FROM TO-MORROW

Having sailed from Yokohama on Tuesday last the Blue Funnel liner Proteslaus is expected to arrive here August 23.

Outbound the Proteslaus will sail from this port September 16.

HAWKEYE STATE REACHES SEATTLE

Admiral Liner Will Leave Here
Next Saturday for the
Orient

The American liner Hawkeye State, which is scheduled to sail from this port August 27 for the Orient, has arrived at Seattle and is now preparing to make her initial voyage in the service of the Pacific Steamship Company. The Hawkeye State has been allocated to the Matson Navigation Company, but in order to insure the continuity of the passenger and freight schedule between Seattle and the Orient, the United States Shipping Board has temporarily assigned the ship to the Admiral Line. The Hawkeye State is commanded by Capt. Charles Peterson.

Over 150 first class passengers, it is stated by the agents, have been booked for the passage of the Hawkeye State, a number of Orientals will be embarked at Victoria, when the ship calls here next Saturday outbound.

E. O. McMicken, passenger traffic manager for the Admiral Line, announces the following revised schedule of sailings from Seattle and Victoria: Hawkeye State, August 27; Silver State, September 17; Keystone State, October 15; Silver State, November 26, and Keystone State, December 24.

LOCKOUT DECLARED BY CHILEAN TRADERS

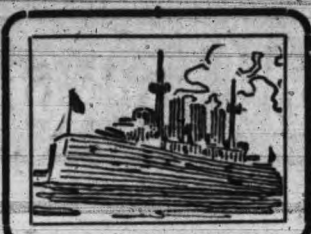

Santiago, Chile, Aug. 20.—The long drawn out warfare between the Valparaiso longshoremen and the Traders' Association, has culminated in a lockout, declared effective Thursday. The traders opened their offices for the registration of free laborers, not connected with the industrial workers of the world. The employment of such labor, which was at the bottom of the agitation, is alleged to have continued after settlement was made by common consent of the parties before the Minister of the Interior in June.

MAQUINNA LEAVING TO-MORROW NIGHT FOR WEST COAST

C.P.R. Boat is Resuming; Will
Carry Full List of
Passengers

Running one day behind schedule, the Canadian Pacific steamer Peinere Maquina will leave port at 11 o'clock to-morrow night for Port Alice and intermediate ports on the west coast of Vancouver Island. The Maquina was turned back to the company to-day after effecting repairs to damage caused recently when she touched bottom in Quatsino Sound.

Under her regular schedule the Maquina was due to sail to-night. The West Coast route is becoming very popular with tourists. This is shown by the fact that the vessel is leaving every trip with full lists of passengers, many being round-trip. The Maquina is taking West Coast route has been widely advertised by the tourists who have made the cruise this year and the expectations are that next season will prove a record-breaker. As a tourist route the West Coast cruise is unexcelled.

VESSEL MOVEMENTS

Rochambeau, at New York, from Havre.

ARIZONA MARU IS TRYING TO MAKE PORT TO-MORROW

O.S.K. Liner May Succeed in
Reaching Quarantine Be-
fore Sundown

Some doubt exists as to whether the inbound Osaka Shosen Kaisha liner Arizona Maru will be able to make quarantine by sundown to-morrow night. At 8 o'clock last night the Arizona Maru gave her position in latitude 49.56 N., longitude 135.33 W. A previous radio message indicated that the ship would make port Sunday afternoon.

The standard hour for sundown at William Head is set for 7:18 p. m. The Arizona Maru reports that she has 24 passengers aboard. There are 9 cabin and 24 steerage for Victoria, and 12 cabin and 30 steerage for Seattle. The ship has 133 bags of mail for Victoria, including 5 bags for the aerial mail route to Seattle. The local freight amounts to about 100 tons.

STEAMER WILL BE ABANDONED

Pacific Mailer, which lies in a battered state on the reefs of San Roque Island. The vessel is beyond hope of salvage and her owners have announced that she will be abandoned.

TRAVELLER BACK FROM ALEXANDRIA

Locally-built. Freighter Made
Quarantine To-day and
Proceeded Up Gulf

Completing her maiden round trip to Egypt, the Canadian Government Freighter Canadian Traveller reached quarantine about noon, and passed here at 1 o'clock bound for Vancouver. The Canadian Traveller is the second and last of the steel freighters built here at the Hospital Point plant of the Harbor Marine Company.

She carried a cargo of British Columbia railroad ties and delivered the shipment at Alexandria after a fast passage. The ship brought back 2,500 tons of raw sugar from Trinidad, and consigned to the Vancouver refinery.

It is probable that the Canadian Traveller will be drydocked at Esquimalt before she goes on berth to load for her next offshore voyage.

The Canadian Government freighter Canadian Winner, also built at the Harbor Marine plant here, is now making her second return voyage from Australasia. The Winner is reported to have passed Honolulu August 17, bound from Sydney, Melbourne and Auckland for Vancouver.

SHIPS WILL OPERATE TO SOUTH AMERICA

Vancouver, Aug. 20.—An active effort to increase existing business between Central and South American points and Vancouver has been started with the appointment of the firm of B. L. Johnson, Walton Company, as agents for the Latin-American Line. The latter company has opened a monthly connection with the South. It is really the old A. Landside Line of Norway, resuming the service that was suspended during the war. Hakon H. Hammer, president of the shipping and trading company of Seattle, who is in the city in company with the explorer, Captain Amundsen, announces the appointment of the Vancouver company as agents for the ships, under the name of the general agent for Puget Sound and British Columbia, which are the A. Landside ships, has been made general agent at San Francisco.

Two ships will serve the Central American States, and three will run to South America. The steamers East California and Sinaloa, both well-known here, will operate to Central America, and the 7,000-ton steamers Romulus and Remus and Regulus will make the longer route to the Southern Continent. The S. S. Baja California will leave for Central America and Mexico in September. S. S. Romulus will leave here early in October for South American States. The Vancouver company of the country of Central and South America have been approached and are now active in assisting the trade relations between the countries and Canada. Considerable quantities of coffee and sugar have already been arranged northward.

REFRIGERATOR SPACE FOR SEVEN STEAMERS

Vancouver, Aug. 20.—The Canadian Government freighter Canadian Highlander will be laid up for six weeks while equipment for a cold storage plant of 5,000 cubic feet is installed. The installation is being done by the Kidston Company, of Montreal.

The equipment has been placed on the steamers Canadian Schirmacher, Canadian Scotia, Canadian Transporter, and will be put on the Canadian Freighter and Canadian English. The latter ship is building at Prince Rupert, and was originally laid down as the Canadian Thresher, but out of deference to English feeling, and to balance the naming of the Canadian Scottish, the name has been changed. Kidston's has the contract to fit all the vessels. They will be used on the Australasian run and perhaps also on the Oriental. The refrigeration space is sufficient for approximately 250 measured tons in each vessel.

Vancouver, Aug. 20.—Charges of mutiny brought against thirty-two members of the crew of the Peruvian Government steamship Iquitos, in port here, by the captain of the vessel, have been withdrawn, and the men have rejoined the ship. Long overdue funds are said to have arrived, and the seamen have been paid their wages.

Acting on advice from the Peruvian Government, Consul H. G. White removed Captain Ober from command, and placed the vessel under Chief Officer J. M. Downes. The Iquitos will proceed to Grays Harbor to load lumber for Australia.
